FUSION

The Fusion featuring DryCORE Technology.

Whites innovative DryCORE technology offers the ultimate in mobility, warmth, and streamlining. Quite simply, there is no comparable dive suit, wet or dry, that can match the performance of this revolutionary new design.

HOW IT WORKS:

First Layer (DryCORE) is a loose fit shell dry suit incorporating latex seals, dry zipper, air intake and exhaust valves to create the waterproof barrier.

The external skin is made with durable stretch fabrics and attached to the DryCORE at the wrists, ankles and dry zipper creating the streamline fit.

THE 2 LAYER DryCORE ADVANTAGE!

HIGH MOBILITY

No other dry suit in the world can match the mobility of the Fusion. The internal loose cut DryCORE is held in place by the independent outer Stretch Skin providing unrestricted movement in your arms, legs and torso.

STREAMLINED

The outer Stretch Skin provides a streamlined outer surface to the suit with minimal drag. No loose fabric wrinkles or double entry tunnels to provide resistance and slow you down as you swim.

DURABILITY

The double layer construction exceeds the durability of current single layer shell type dry suits. Only premium grade dry zippers, latex seals, and materials are used in the construction resulting in a hard wearing long lasting suit.

VERSATILITY IN THE OUTER SKIN

Planning on travelling to tropical destinations? No problem just Velcro on the Fusion Sport skin - the ultimate suit for travel, flexibility, and durability. How about cold water? The Fusion hybrid tech skin or the tech LE skin provide higher abrasion resistance and thermal protection, while maintaining unmatched mobility.

HUGE TEMPERATURE RANGE

The DryCORE Technology provides a dry barrier against the elements. Match your thermal undergarment to the conditions just like traditional dry suits, layering up or down. The Fusion has you covered from ice diving to the tropics!

BUOYANCY CONTROL

The outer Stretch Skin places an even external pressure over the inner surface of the DryCORE making dry suit buoyancy control a snap. Providing the exhaust valve is set correctly, this external pressure will assist the diver maintaining the perfect amount air volume within the suit. Maintaining proper air volume leads to better "bubble" management.

WARMER

The constant pressure of the outer Stretch Skin regulates the air layer within the DryCORE eliminating hot and cold spots, while at the same time reducing your body energy output to keep warm.

LESS WEIGHT

Less air in the suit requires 10% less weight on your belt!

COMPACT

The Fusion folds up into half the size of a cold water wet suit or traditional dry suit. Easy traveling.

EASY SELF ENTRY

Front entry design for easy donning.

COMPLETE

Suit comes complete with bag, low pressure hose and zip wax.

FUSION SPORT

- Heavy Duty Super Stretch Lycra
- Lightweight & Travel friendly
- Quick to dry

Thermal Layer:

Choose your underwear to match the temperature.

DryCORE:

Internal dry core made with tough, proven military 200 denier Quadflex material. Attached dry socks for easy entry and increased comfort. This is the layer that keeps you dry!

External Skin:

Protective & durable stretch fabric skin for streamlining and abrasion resistance. Removable and replaceable from DryCORE via Velcro fasteners. Pick the outer skin to match your diving specialty.

FUSION TECH

- Hybrid skin for extra durability & optimal stretch
- Durable 1 mm neoprene with super stretch Lycra Panels
- Tribal graphics
- Optional Pockets Available

FUSION TECH L.E.

- Limited Edition 1mm super stretch neoprene
- 2mm DT2 Compressed neoprene knee pads
- Solid Black with new Helmet/Tridents Logo
- Optional Pockets Available

*4XLplus is available ONLY in the SPORT model until further notice. A Tech version with pockets as an option is schedule for production release late spring 2009.

HEAVY DUTY

brass dry zipper with protective outer flap. The ultimate in Dry!

DOUBLE CUFF

at wrists minimizes water entry into gloves for increased warmth.

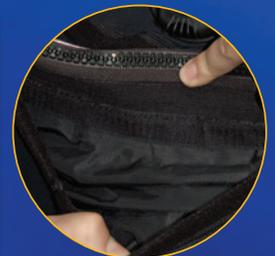

COLOURS

Check www.whitesdiving.com regularly for up to date skin selections.

OUTER SKIN

is easily interchangeable from DryCORE via Velcro fasteners. Match your skin for your dive!

TOUGH COAT

KNEES for abrasion resistance and maximum mobility.

BELLOWS STYLE POCKET (11"x6")

with drains and expanding lock stitching ensure proper waterflow and no loss of mobility. 2 grommets for bungee cord attachment.
