SHIPPING HOSE IS COSTLY

Not surprisingly, the bigger the hose, the more costly it will be to ship. Both the weight and size of the hose will determine the cost and we do our best to try and get you the best rate possible and use SHIPTIME who compares rates from all the carriers ensuring you've received the most competitive rate out there.

The weight and size of your order is how we determine our US rates

Hose & Dig Tube shipping rates

SHIPPING RATES TO THE UNITED STATES

Shipping rates to the US have been volatile during COVID. We work hard to find you the best rate but the larger hoses do result in additional carrier fees.
