

THE SOFA IN A SNUG BOX COMPANY

THE
sofa bed
IS MADE
UP OF:

4 X LEGS

1 X RIGHT ARMREST
1 X LEFT ARMREST

2 X SEAT CUSHION
2 X BACK CUSHION

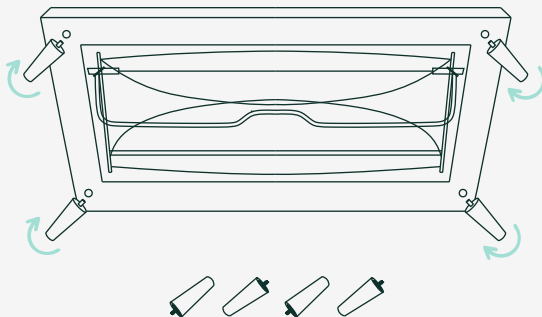

1 X BASE WITH MATTRESS

1 X BACK REST

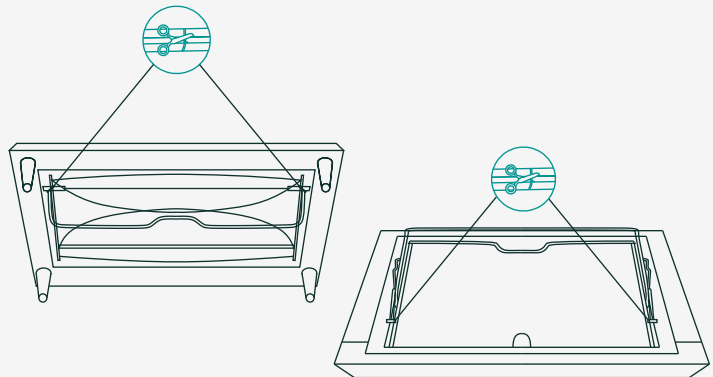

1

Put my legs on by twisting them **clockwise**.
Make sure they are **tightly fixed** to the base.

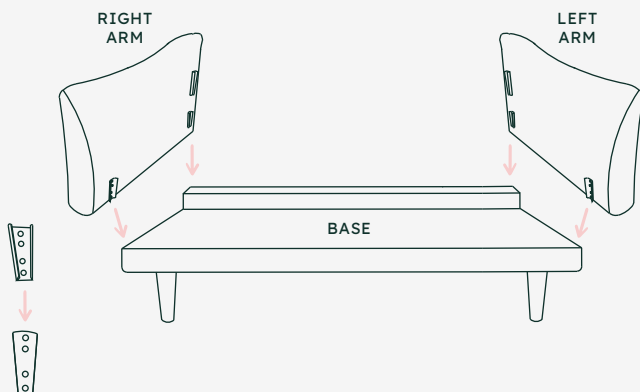

2

Cut straps to allow mechanism to move freely.
Carefully flip the sofa bed base.

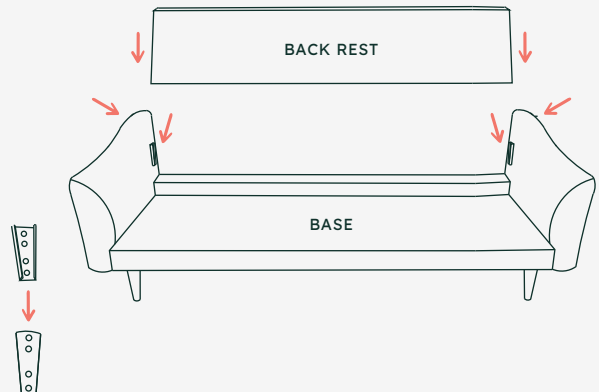

3

Align the metal bits on my arms with the ones on my bum and
push them down. Apply pressure until they are completely fixed.

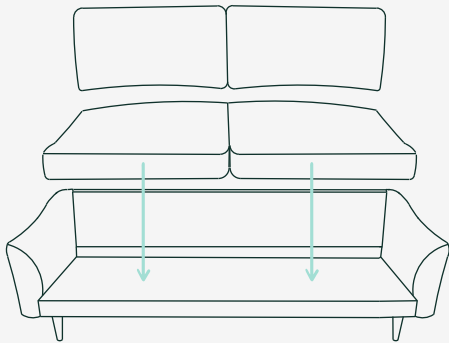

4

My back needs fixing as well. Push the arms inwards
as you secure the back in place, pushing it down firmly.

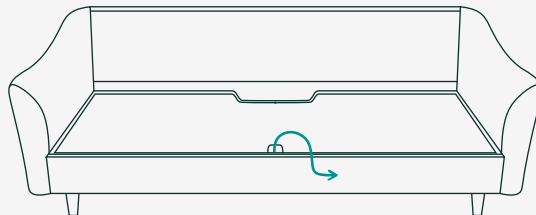

5

Finally put the cushions on. I look great, right? You can also find assembly videos at www.snugsofa.com/assembly

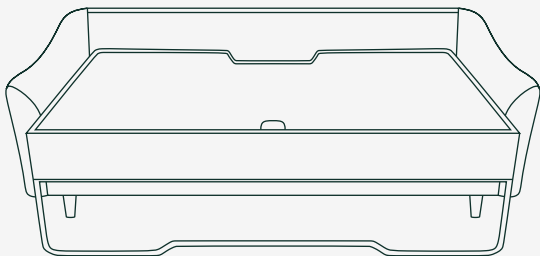

6

If you want to use as a bed, remove all cushions. Grab the handle, lift it and pull the mattress out.

7

Place the middle support bar on the floor. Just make sure it's an even surface!

8

Unfold the mattress and place the metal feet on the floor. Now the bed is ready for your guests!
