For more than 40 years, Philip Makanna has captured a treasure trove of images and shared them via his *GHOSTS* books and calendars. Here, we present a few of our favorites by the world-renowned photographer.

On the Calendar

Every year since 1980, Northern California-based photographer **Philip Makanna** has added to his stunning collection of books and calendars.

Along with his wife, Jeanie, the couple has produced the super-sized annuals carrying the title *GHOSTS*. This year, they released a new book (Makanna claims it's his last; we hope not) and two striking calendars that celebrate the flying machines that helped shape World War I and World War II. His numerous accolades, including the International Society for Aviation Photographer's Lifetime Achievement Award, have not come without bruises. In 2001 the plane from which he was photographing crashed. "That's just a dream now," Makanna says. "The airplane was burning, and my pilot was unconscious. I pulled him out and dragged him away. They say that I have title to a small patch of Duxford grass." Makanna's exciting new book and 2021 calendars are available from ghosts.com.

GHOSTS 2021: A Time Remembered, Aviation in World War Two; GHOSTS 2021: The Great War, Aviation in World War One, \$15.99 each, ghosts.com
