

The 'V' shaped push along snow plough offers a simple design that allows you to push snow whilst keeping your body in an upright position, instead of relying on the strength of your lower back.

The angled steel blade of this pedestrian snow plough allows the snow to easily slide off either side.

With a robust and durable steel blade, the pedestrian snow plough is ideal for use in restricted areas such as garden paths, side passages and business premises walkways

Product is supplied fully assembled

Model Ref	Blade Width (mm)	Blade Height (mm)	Handle Height (mm)	Handle Width (mm)	Weight (kg)
PSPV-900	900	165	1110	410	8

Features & Benefits

- Simple design allows you to remove snow whilst keeping your body upright
- Takes the strain off the lower back by utilising bodyweight, arms and legs for pushing
- 'V' shaped plough allows snow to slide off from either side of the blade
- Manufactured from mild steel with high quality epoxy finish for long term durability
- Mounted on 160mm solid rubber tyred wheels and roller bearings
