

# DATA, INSIGHT & ACCURACY DELIVERED TO YOUR DOORSTEP

aboutGOLF®

## INTRODUCING AG TRAINER

If you're an avid golfer looking to level up your game, aG Trainer is for you. You'll get the aboutGOLF combination of brains and beauty with the most accurate ball tracking technology on the market. We deliver everything you need to be immersed in the game—except the clubs.

aG Trainer is aboutGOLF's DIY simulator-in-a-box. You create the enclosure and select your audio-visual equipment, and we'll send you aboutGOLF's award-winning technology featured in their premium simulators. If you want a simulator with its own enclosure, audio-visual equipment, and an attractive look and feel, we recommend upgrading to aG Trainer Pro.

Whether you choose a DIY aG Trainer model or our premium aG Links Curve with white-glove installation, you'll always get our state-of-the-art 3Trak® ball tracking technology. We deliver the same high-quality experience no matter which configuration you choose.

### FOR GOLFERS

aG Trainer enables golfers of any skill level to play and improve their game anytime and any season by bringing the game indoors.

### FOR COACHES

aG Trainer provides coaches a way to deliver a new dimension of data, insight, and credibility to their coaching practice with an indoor solution that fits in a compact space.
