

# ROOF HATCH

Electric Drive • Requires 12V Service

## DOUBLE PANE ACRYLIC

(light gray, cannot tint)  
5.25 times more thermally efficient than glass and 2.14 times lighter than glass.

## BREATH-ABILITY

The Roof Hatch features a breathable seal that prevents the entry of dust, but allows for some breath-ability in the cabin.

## BOSCH DRIVE MOTOR

and a removable emergency hand crank. These hatches have been tested to 5000+ cycles with no failure.

## STRONG MATERIAL

The body of this hatch is high strength white ABS.

## OPTIONAL SPOILER

This unique spoiler has a white acrylic exterior laminated to a fiberglass interior layer. This spoiler is highly recommended if the front of the hatch is exposed to high speed oncoming air / water. If the hatch is mounted behind a solar panel or other wind break, it would not be necessary. The spoiler reduces cabin wind noise.

## ROOF HATCH TRIM

Bright white LEDs can serve as primary light in most cabins. Mounting is by adhesive and clips.

## IMPACT RESISTANT

17 times more resistant to impact than glass. Does not shatter!

## UV RESISTANT

Genuine G.E. Lucite Perspex. Less than 2% clarity loss over 10 years in full sun.

## DOT CERTIFIED

and meets ECE standards.

## BLIND & SCREEN

Pleated retractable screen and blind.
