

Tire Carrier Instructions

Parts List

1 x Track Bracket	6 x Nut	2x Lugs
1 x Wheel Bracket	4 x Bolt	
1 x Support Bracket	10 x Washer	

Tools Required

2 x 9/16 wrench/socket.

1. Slide track bracket onto bed track in desired location.

2. Attach support bracket over the track bracket.

3. Using 2 nuts tighten down the support bracket to the track bracket.

4. Align the wheel bracket with the support bracket and feed 1 bolt per slot towards the center.

5. Use 1 washer and 1 nut PER SLOT and tighten down at the desired height (depending on tire size)
6. Mount the tire onto the wheel bracket and use the 2 lugs to secure the tire to the bracket.

****Note**** The support or tire bracket can be flipped depending on tire size and location of track mount.
