

A Specially Formulated Supplement

Supplements can provide a woman's reproductive system with the essential nutrients that it needs to enhance female fertility.

Natural ingredients

Source of antioxidants like Resveratrol

Protects against neural tube defects

A good start for mother and baby

Advanced formula

Inositol to support healthy ovulation

Pregnancy & Nutrition

For women of childbearing age, good nutrition is important for preparing the body for the demands of pregnancy.

FOLIC ACID

Folic acid helps prevent neural tube birth defects, which affect the brain and spinal cord.

VITAMIN D

Vitamin D deficiency is common among pregnant women in most populations, and has been found to be associated with an increased risk of pre-eclampsia, gestational diabetes mellitus, preterm birth, and other tissue-specific conditions. Vitamin D supplementation during pregnancy improves maternal vitamin D status and reduces the risk of pre-eclampsia, low birthweight and preterm birth.

IODINE

Iodine is critical for a woman's healthy thyroid function during pregnancy. A deficiency in iodine can cause stunted physical growth, severe mental disability, and deafness. Not enough iodine can lead to miscarriage and stillbirth.

IRON

Iron helps blood - in both the mother and baby - carry oxygen. Iron supplementation is recommended throughout pregnancy.

Medfertil for Women

A Good Start for Mother and Baby

Specially formulated to offer a complete combination of preconception, prenatal vitamins to contribute to a healthier conception process and pregnancy.
