

Cement Tile

WHAT TO EXPECT?

In some patterns of Cement tile, it is normal to have small variation of colors or stains in some parts of the tile, those characteristics are naturally part of this tile model.

This style of tile can be used in walls and floors, we strongly recommend after installing the tile, apply a sealant so that the color does not wear off or possible permanent stains.

Above are not defects, they are common characteristics in some of the tiles Cement Tiles. Those are subject to variations in color, shade, size, surface texture and finish. Prior to installation, installer must blend tiles from several different boxes to achieve an even distribution of color range.
