We provide **the highest quality healthcare equipment**, all based around our philosophy:

1. **Protect the patient** from discomfort and make transfers less disruptive
2. **Protect the care and nursing team** from manual handling risks
3. **Protect the organisation** by providing safe, fit for purpose and well-maintained equipment

This brochure features products which enable early mobilisation, either encouraging patients off the bed, to other wards, or outside, whilst limiting transfers. We have a number of other products in our range that also do this, so please get in touch if you are interested.

Added to this, part of the NHS recovery plan is to increase day surgeries and elective surgeries in the foreseeable future.

Our icons highlight essential features on the healthcare furniture such as electric handset, Trendelenberg feature, and height adjustable, among other attributes.

OUR PROMISE TO YOU

Here at Caremed we promise that all our healthcare equipment is accurately specified, rapidly deployed and impeccably clean.

You can hire or purchase any of our NHS approved products, just get in touch with us via LiveChat on caremed-alrick.com, email or telephone to discuss further.

MOBILISE® CHAIRS FOR CRITICAL CARE, TRAUMA AND REHAB

We have been providing Sertain™ and our Mobilise® chairs to the NHS for a number of years now, and really know what works.

The chairs in here are all best sellers and are ideal for critical care, trauma, rehab and other wards.

We also offer bariatric chairs in our range, which have a safe working load of 300kg.

Mobilise®

Mobilise® layflat® CH5 critical care chair

An innovative, early mobilisation chair that lays 100% flat and has an innovative legrest that encourages sit to standing.

It has all the features you would expect from an early mobilisation chair, and a few added extras thanks to feedback from critical care and physios on the current early mobilisation chairs available.

And it is manufactured right here in the UK, greatly reducing lead-times and CO² emissions.

On the approved NHS Supplier list

Features

- ✓ Easy pat sliding from bed to chair or chair to bed
- ✓ Tilt-in-space
- ✓ Simple to clean thoroughly
- ✓ Works seamlessly with a number of popular healthcare equipment pieces such as the Stedy, ReTurn and Sara Plus
- ✓ Take your patients outside thanks to the twin wheel 125mm castors

Specifications

Seat width	adjustable from 510 - 560mm
Hi-lo range	490 - 790mm
Safe Working Load (SWL)	160kg (25 stone)
Framework	Steel & stainless steel
Covering	Dartex Endurance material
Code	CH5-S

MOBILISE® CHAIRS

Mobilise® layflat® CH5 neuro ICU chair

An advanced version of the Mobilise CH5-S critical care chair, we have added thoracic supports and active / therapeutic pressure care to enhance the functions further for complex neuro / neuro rehabilitation patients.

Easily and quickly mobilise and sit out your neuro critical care and trauma patients. Eliminate hoist transfers by pat sliding from bed to chair, thereby significantly reducing manual handling.

On the approved NHS Supplier list

Specifications

Seat width	adjustable from 510 - 560mm
Hi-lo range	490 - 790mm
SWL	160kg (25 stone)
Wheels	Twin wheel 125mm castors with total lock or directional lock
Covering	Dartex Endurance material
Code	CH5-neuro

Features

- Thoracic supports which can be moved to the correct position for the patient
- Removable arms
- Tilt-in-space
- Retractable legrest – fully retracts beneath the seat for easy sit to standing
- Easily removable footplate

Mobilise® CH5 bariatric critical care multifunctional chair

An innovative, bariatric early mobilisation chair that has a SWL of 250kg, with 100% layflat® this chair is manufactured in the UK, using UK materials which greatly reduces lead-times.

The chair reduces manual handling strain on HCP's whilst encouraging simple early mobilisation with patients - the layflat® option allows the patient to be moved from bed to chair and then slowly mobilised.

On the approved NHS Supplier list

Features

- 250kg safe working load.
- Retractable legrest (with removable footplate) - fully retracts beneath the seat so easier sit-to-standing.
- Adjustable seat width to 660mm.
- Strong, padded removable armrests
- Lay flat dimensions; length 1830mm x 660mm wide

Specifications

Seat width	adjustable from 550 - 660mm
Hi-lo range	520 - 820mm
Framework	Steel and stainless steel
Covering	Dartex Endurance material
Code	CH5-L

TREATMENT AND THERAPY CHAIRS IDEAL FOR CRITICAL CARE, TRAUMA AND REHAB

These chairs are all ideally suited for treatments and therapies. They allow the patient to be both comfortable during treatment and allow the HCP to be able to move easily around the chair. Most of the chairs have variable heights, and the arm and legrests are all easily manoeuvred or removed, depending on the treatment. These chairs can be easily and safely moved around wards.

MR1068 fixed height care chair

This care chair has been specifically designed to compliment the needs of patients with a moderate mobility moving around wards.

This is a great solution for patients who need to move between wards for therapy.

When the armrests are at maximum height, they not only create lateral containment, but also can be used as support for patients when assisting them to stand.

On the approved NHS Supplier list

Features

- Move a patient safely from bed to chair by reducing the armrests to their minimum height
- Four swivel castors, 2 front and 2 rear directional with brakes which ensure excellent manoeuvrability
- Backrest inclination: 95° / 162°
- Legrest inclination: -90° / 10°

Specifications

Seat size	Width	54cm
	Depth	45cm
	Height	52cm (from the floor)
SWL	150kg (23.5 stone)	
Framework	Steel tubing	
Seat, backrest and legrest covering	Polyurethane foam covered in leatherette	
Code	MR1068	

TREATMENT AND THERAPY CHAIRS

Mobilise® AP4297 treatment chair

The Mobilise® AP4297 therapy chair is perfect for use in clinic and hospital settings, allowing easy access during different therapeutic treatments, while guaranteeing maximum comfort to the patient.

Ideal for giving blood or taking blood samples.

Available on NHS Supply Chain website, code FAM19813

Features

- Each chair function can be achieved through a remote handset and a high-precision foot control
- Auto controlled Trendelenburg and bed positions
- Tilt up armrests
- Special paddings that fit to the body shape allowing comfort whilst therapeutic treatments take place

Specifications

Adjust. seat height	54-76cm
SWL	200kg (31 stone)
Covering	Seamless, fireproof and anti-static upholstery, allowing for easy cleaning between patients
Code	AP4297

SPECIALIST CHAIRS FOR EASY TRANSFER

IDEAL FOR WARDS BUT ALSO SUITED FOR CRITICAL CARE AND REHAB

Since we started in 2007, over 60% of the UK's intensive care units now use our seating daily.

Encouraging the patient out of bed, and then having the best patient seating in the care environment can make a huge difference to wellbeing, cognitive function and rehabilitation.

Our chairs are suitable for mobility in wards, but also ideal for critical care and rehabilitation. Remember, you can ask for a trial or rent these products if you want to test their capabilities.

MR1063 Armchair

Ideal for stroke patients, this chair provides numerous sitting positions to suit the patient and to assist transfer, with elevating legrest, fold out footrest and adjustable headrest.

Available on NHS Supply Chain website, code FAM19823

Features

- Backrest has a push handle and lumbar support inside
- The armrests are collapsible and height-adjustable in six different positions
- Four swivel castors, 2 front and 2 rear directional with brakes which ensure excellent manoeuvrability
- Backrest inclination: 95° / 162°
- Legrest inclination: -90° / 10°

Specifications

Seat size	Width	54cm
	Depth	45cm
	Height	52cm (from the floor)
SWL	150kg (23.5 stone)	
Framework	Steel tubing	
Seat, backrest and legrest covering	Polyurethane foam covered in leatherette	
Code	MR1063	

SPECIALIST CHAIRS FOR EASY TRANSFER

MR1076 highback orthopaedic seat

With a safe working load of 135kg, this orthopaedic adjustable specialist seat has a high back, elevating back rest, legrest and adjustable headrest.

Padded armrests are collapsible to facilitate ease of movement and mobility of the patient.

Available on NHS Supply Chain website, code FAM19818

Features

- Backrest inclination 95° / 162°
- Legrest inclination -90° / 10°
- Four non marking, swivel castors
- Accessories include - adjustable IV pole, left and right clamp for IV pole and oxygen tank holder

Specifications
