TRI TEST USER GUIDE

PAPER TEST with Counterfeit Pen

For bills printed 1960 and after

1. Remove pen from slot on right side of the Tri-Test and make small mark
2. Yellow or light mark indicates authenticate currency
3. Black or dark mark indicates currency is suspect

SECURITY THREAD test with UV Light

\$5 through \$100 bills printed after 2006 have embedded security thread

1. Place bill portrait side up on white platter
2. Press toggle switch forward on right side of Tri Test to activate UV light
3. Security stripe will illuminate
4. Security stripe must match color and location for each denomination as noted on the graphic strip on the front of the Tri Test

\$5 BLUE SECURITY THREAD

Printed Before 2006

\$10 YELLOW SECURITY THREAD

Printed After 2006

\$20 GREEN SECURITY THREAD

\$50 GOLD SECURITY THREAD WITH UV LIGHT

\$100 PINK SECURITY THREAD WITH UV LIGHT

WATERMARK PORTRAIT TEST WITH BACKLIT LED

For US currency \$5 and higher printed 1996 and after completing the UV test, flip the toggle switch back (in the opposite direction) to illuminate the the white platter area of the Tri Test. A "Watermark" on the right side of the bill should appear and mirror the image of the portrait in the center of the bill. (EXCEPTIONS: There are no watermarks on \$1 bills. On \$5 bills printed 2006 and after there is a large 5 watermark). Also note that small type indicating the bill denomination will appear where the security stripe is located.

AUTHENTICATES SECURITY FEATURES FOR THESE DOCUMENTS AND MORE

Drivers License

Credit Card

Passport

This product is highly effective when used correctly. It is not guaranteed to detect 100% of counterfeit notes. Visit www.moneyfactory.com for additional information and security features on U.S. currency. The Tri Test is also highly effective to authenticate Drivers Licenses, Credit Cards, Passports, Travelers Checks, and most Foreign Currency. The Tri Test uses 3 "C" batteries. To install, open the battery compartment in the bottom of the unit and insert the batteries, noting the orientation of the positive (+) and negative (-) terminals. Dri Mark Counterfeit Pen replacements available at most office supply stores. Optional AC Adapter available.
