

# Chapter 1:

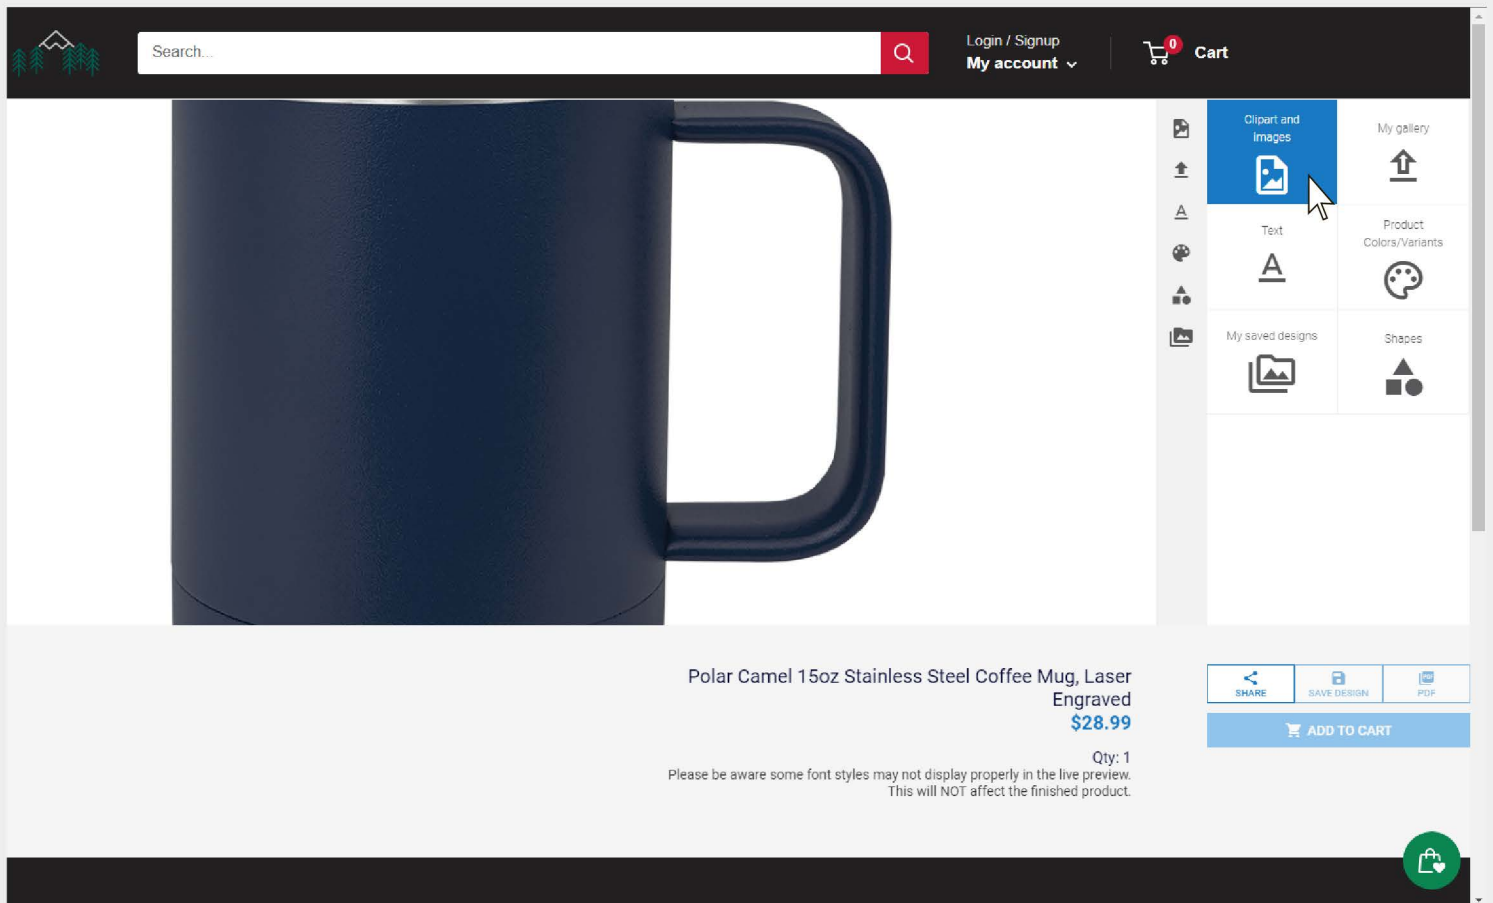

## Basic Controls

## Step 1: Search through our design library

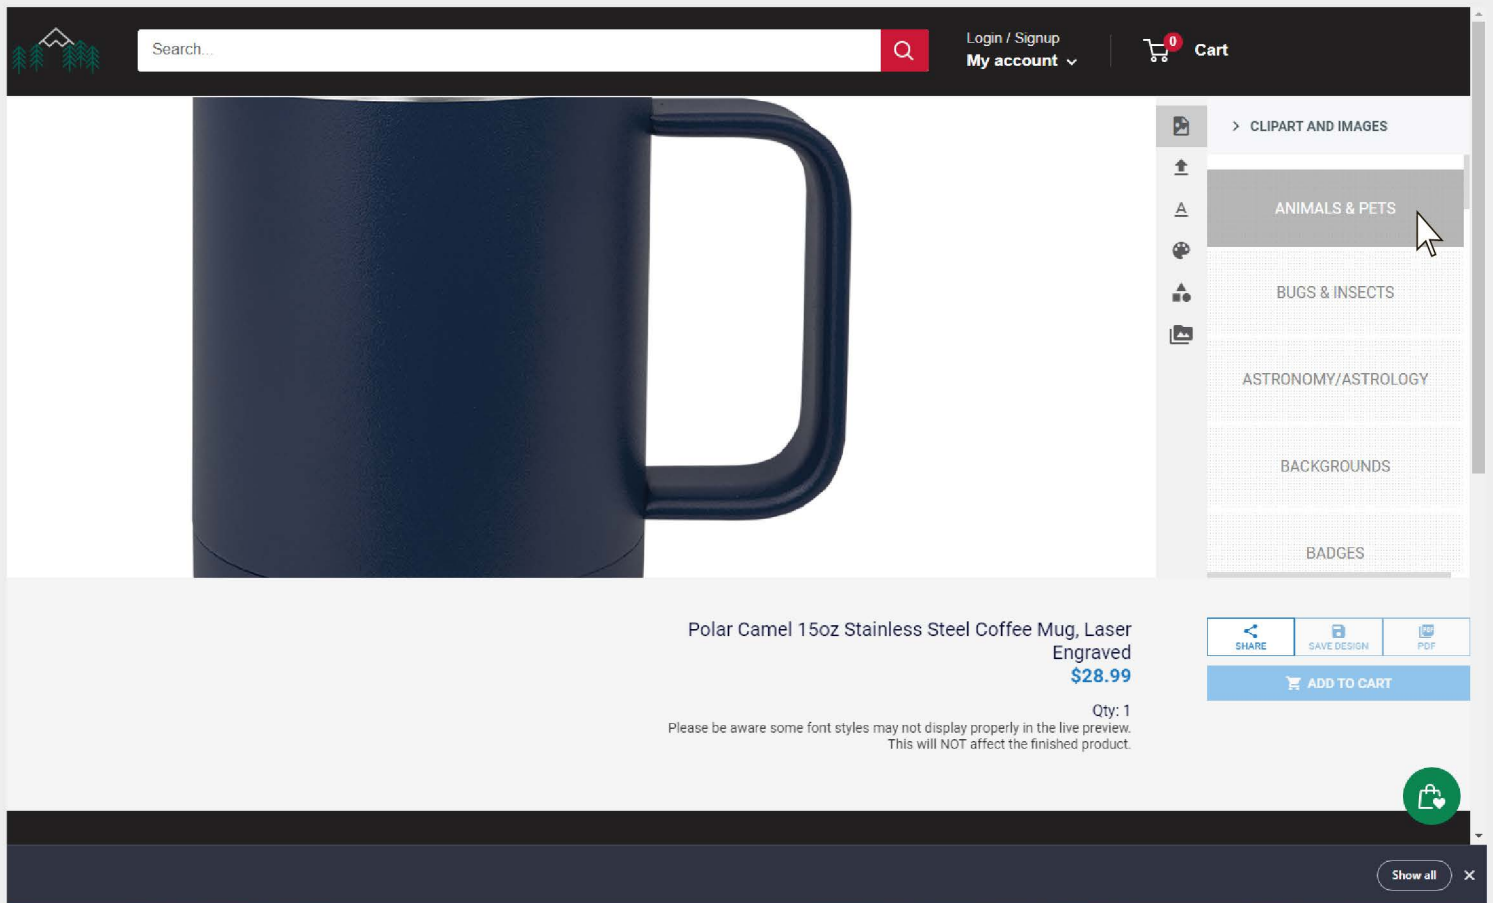

To search through our library of preformatted designs, simply select the 'Clipart and Images' button located on the right side of the menu

## Step 2: Select a category

Select one of the broad categories to explore the available artwork.

## Step 3: Select a design

Select a design to load it into the live preview

The screenshot displays a product customizer interface. At the top, a black banner features a repeating 'SALE' pattern and a central message: 'Sublimation Dye Products Are 20% Off, This Week Only! SUBDYE20'. Below the banner is a navigation bar with a search bar, 'Login / Signup My account', and a 'Cart' icon with a '0' notification. The main area shows a large image of a dark blue mug. To the right is a 'CLIPART AND IMAGES' panel with a search bar containing 'Bear\_AbstracT\_01\_BW'. It displays a grid of design options: 'Bear\_AbstracT\_01\_BW' (a black and white bear silhouette), 'Bear\_AbstracT\_02...' (a colorful bear), 'Bear\_AbstracT\_03...' (a bear face with a floral pattern), 'Bear\_AbstracT\_04...' (a colorful bear), 'Bear\_Nature\_01\_B...' (a bear silhouette in a forest), and 'Bear\_Nature\_02\_B...' (a bear silhouette). Below the mug, the text reads: 'Polar Camel 15oz Stainless Steel Coffee Mug, Laser Engraved \$28.99'. A 'Qty: 1' label is present, along with a disclaimer: 'Please be aware some font styles may not display properly in the live preview. This will NOT affect the finished product.' At the bottom right, there are buttons for 'SHARE', 'SAVE DESIGN', 'PDF', and 'ADD TO CART', and a green circular icon with a shopping bag.

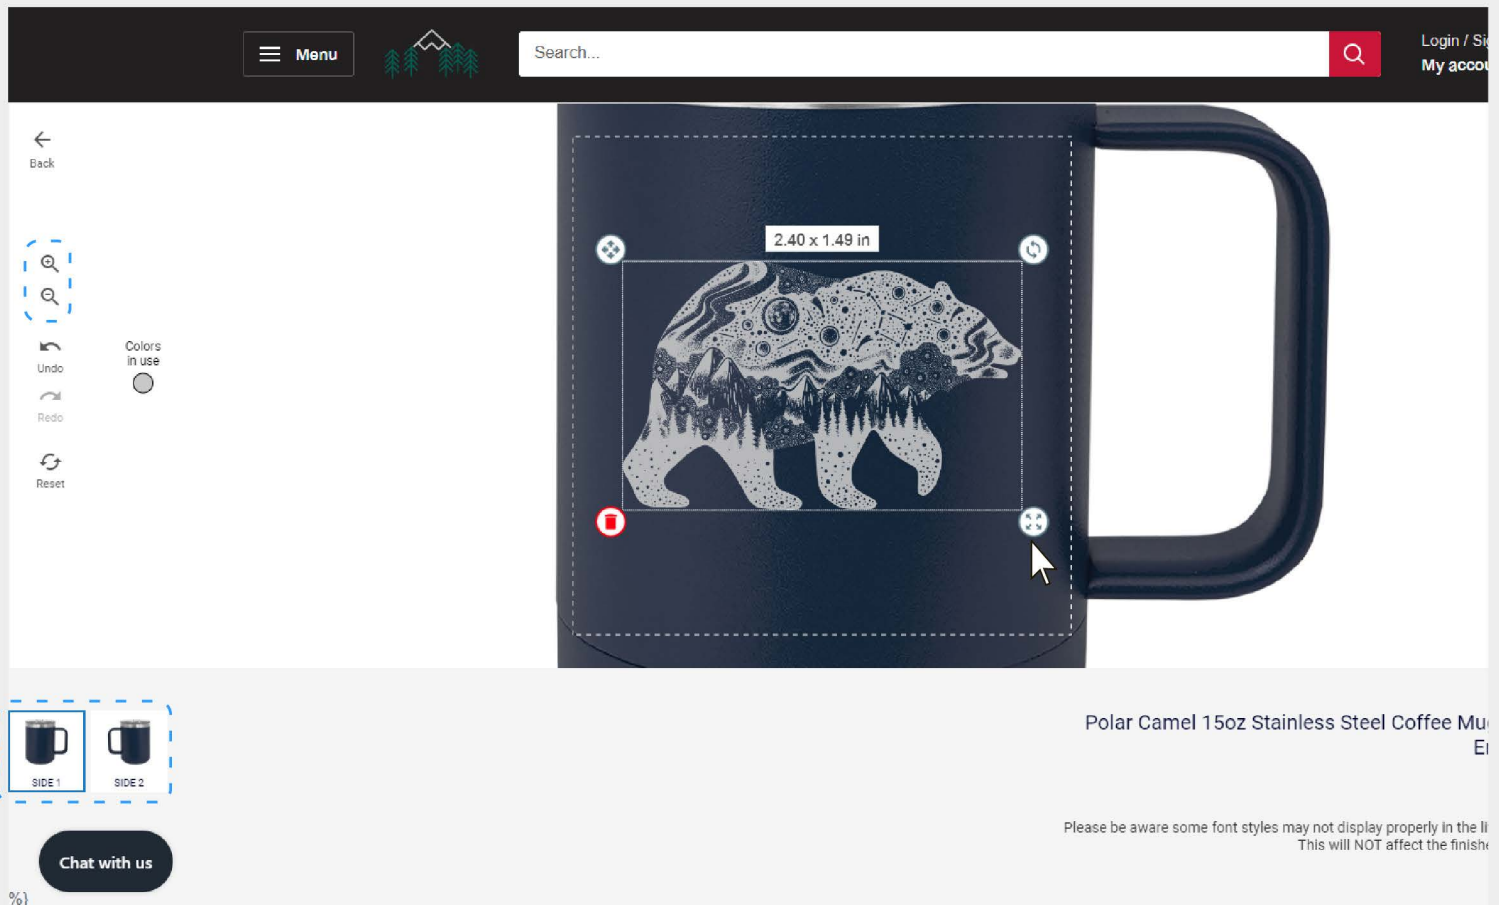

## Step 4: Artboard, zoom, customizable surfaces.

The selected design will be loaded on the artboard.

If you want to zoom in/out, use the controls on the left hand side of the page.

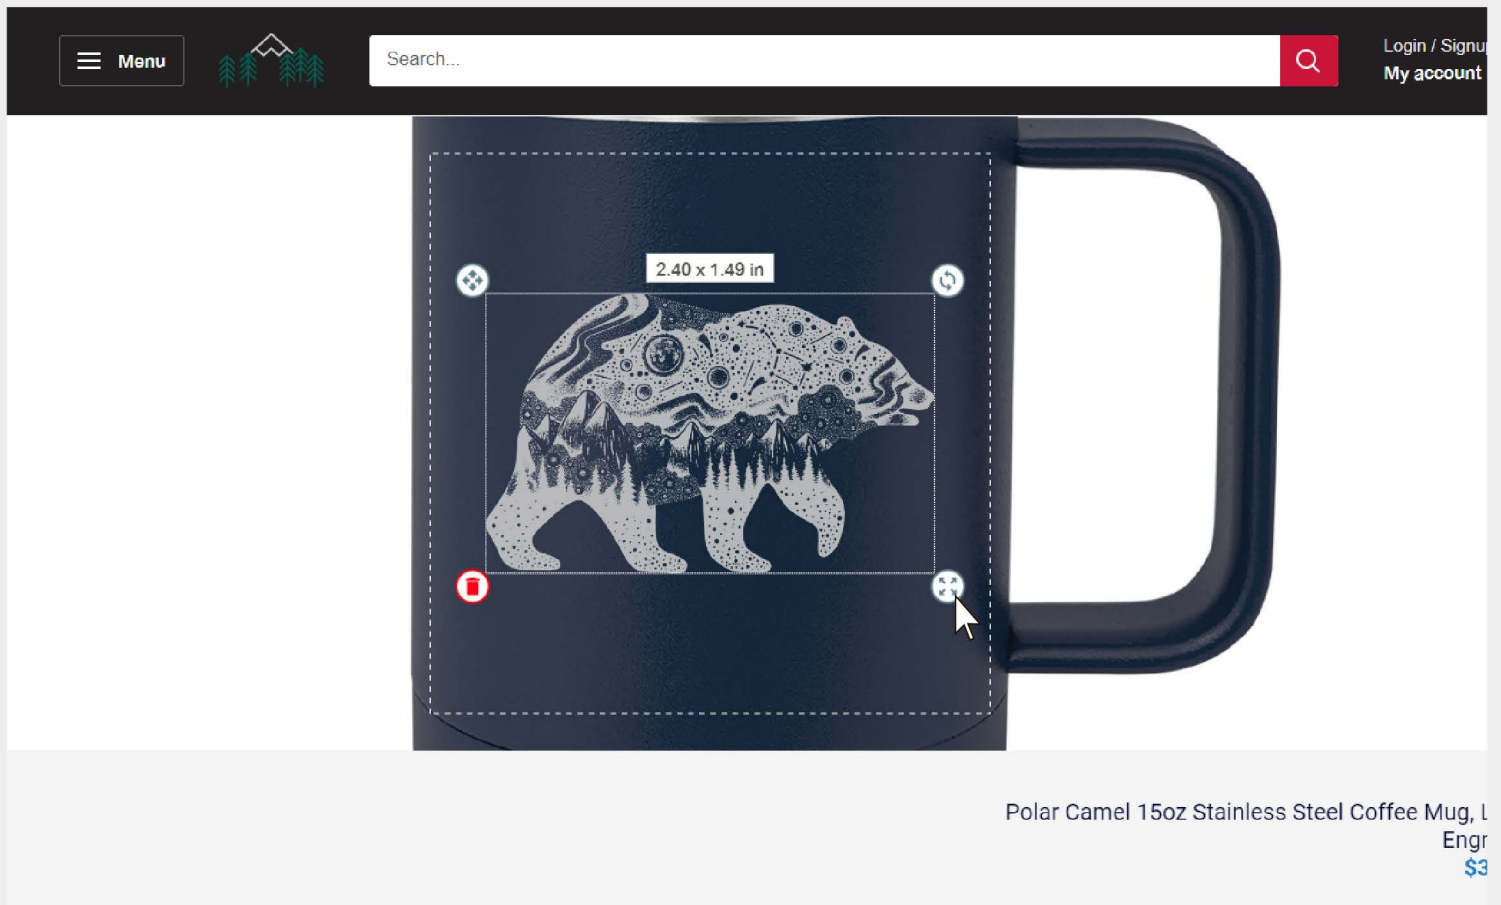

You can also select the other customizable surfaces from the lower-left. For instance, if you want the handle to be left-facing instead, simply select 'Side 2'. If you want to customize both sides, then you can do that as well.

## Step 5: Main artwork controls

With the artwork selected, you will see handles in the corners that will allow you to Move, Rotate, Resize, or Delete the artwork.

## Step 6: Adding text

To add text to your design, select the 'Text' button.

### Step 3 : Warning message

If you are switching to a color type that has a different color specification than the one you were working on, you will be presented with this warning message.

This is just a notification popup, and you will need to click 'Yes' to proceed with the variant change.

The screenshot displays a product customization interface for a 15oz Stainless Steel Coffee Mug. A warning message popup is centered on the screen, featuring a large exclamation mark icon and the text: "WARNING! The selected printing method does not support one or more design elements (image, text, color, ...) that you already added to the product. By proceeding some elements may be modified or removed. Wish to continue?". Below the text are two blue buttons labeled "YES" and "NO". A mouse cursor is pointing at the "YES" button. The background shows a dark blue mug with a white design of a dog's head. The interface includes a search bar, a navigation menu with options like "Color" (Stainless) and "Lid Option" (Standard), and a price tag of \$34.47. A footer note states: "Please be aware some font styles may not display properly in the live preview. This will NOT affect the finished product."

### Step 4 : Product variant change

Changing the product color/variant will be reflected in the live preview, where you can continue editing.

### Step 5 : Additional sides

Each surface is available to be customized, simply select the surfaces you wish to have personalized from the available options at the lower left.

If, for some reason, the color of the customization does not appear to be correct, you can click 'Colors in use' and set the global color to match the product specification.

Please note that adding additional artwork, and/or customizing multiple sides will affect the product price.

Also note that applicable discounts will not be shown until you add the product to your cart.

## Saving Your Artwork

### Step 1: Save your artwork

You can save your design for later use by clicking the 'Save Design' button, located above the 'Add to Cart' button.

You can reload any saved designs later on by clicking the 'My saved designs' button.

**IMPORTANT:** This feature uses browser cookies, so clearing your browser's cookies will also clear any designs that you have saved.

**ALSO NOTE:** Once you have placed an order, we will have your saved designs on file, and you can simply reorder from within your Craftworks NW account.

The screenshot displays the Craftworks NW product customizer interface. At the top, there is a search bar, a search icon, and links for 'Login / Signup' and 'My account'. A shopping cart icon shows 500 items. The main area features a preview of a stainless steel coffee mug with a 'Mama Bear' design. A dialog box is open over the preview, containing a preview of the design, a 'Name\*' field with 'Design name' as a placeholder, a 'Tags' field with 'your tags' as a placeholder, and two buttons: 'SAVE' and 'SAVE AS NEW COPY'. To the right of the preview is a toolbar with icons for 'Clipart and images', 'Text', 'My saved designs', 'My gallery', 'Product Colors/Variants', and 'Shapes'. At the bottom of the interface, there are buttons for 'SHARE', 'SAVE DESIGN', and 'ADD TO CART'. The product name 'Stainless Steel Coffee Mug, Laser Engraved' and price '\$37.96' are visible below the preview.

### Step 2: Save your proof

To download a copy of your design, simply click the 'PDF' button, located above the 'Add to Cart' button.

You will see an icon indicating that the app is 'processing' your request, followed by a pop-up window that will offer you a link to download your proof file, in a .pdf format.

The screenshot displays a product customizer interface for a stainless steel coffee mug. A pop-up window titled "PDF PREVIEW" is centered on the screen, indicating that the export process is complete and providing a link to download the PDF. The background shows the product design options, including a sidebar with icons for clipart, text, colors, and shapes, and a bottom navigation bar with buttons for "SHARE", "SAVE DESIGN", "PDF", and "ADD TO CART".

Uploading Your Own Artwork

## Chapter 4: Uploading Your Own Images

### Step 1: My Gallery

To begin uploading your own artwork files, click the 'My Gallery' button.

You can upload your own image files, in a variety of formats:

Vector image files with an .svg, .eps, .ai\*, or .pdf file format

Bitmap images in .png, or .jpg format.

\*.ai files must be saved as a '.pdf compatible' file.

The screenshot shows a product customization interface. At the top, there is a search bar on the left, and 'Login / Signup' and 'My account' on the right. A shopping cart icon with '500' and 'Cart' is also visible. The main area features a large image of a blue 3-ring binder with white stitching. To the right of the binder is a vertical toolbar with icons for 'Clipart and images', 'Text', 'My saved designs', 'Product Colors/Variants', and 'Shapes'. The 'My gallery' button, which has an upload icon, is highlighted in blue and has a mouse cursor over it. Below the binder image, the product name and price are displayed: '3-Ring Binder w/1" Slant Rings, 10 1/2" x 11 1/2", Laserable Leatherette, Laser Engraved \$28.99'. At the bottom right, there are buttons for 'SHARE', 'SAVE DESIGN', and 'ADD TO CART'.

### Step 2: File Uploader Options

For most images/graphic files, you will use the 'From your device' button.

For images/graphic files that end in .pdf, .eps, or .ai file extensions, you will need to use the 'PDF/EPS/AI' button in order to upload the file.

Depending on the product being customized, you may find your preferred image under the 'Premium Photos' tab. Images found there may not be the greatest laser engraving images, but they will be usable in the many sub dye products that we offer.

## Chapter 4: Uploading Your Own Images

### Step 3: Uploaded image, removing colors

When you initially upload your image file, the customizer will detect the color(s) contained in the image (including the background color, if applicable).

If your image does not have a transparent background, you may see a solid box when your image first loads into the live preview.

With the artwork selected, you will need to 'remove', or 'turn off' the unwanted color(s).

In this example, our image has a white background, so we will need to remove it, and then click 'Update image' to refresh the preview.

## Chapter 4: Uploading Your Own Images

### Step 4: Uploaded image, cropping artwork

If you uploaded a bitmap (.jpg, or .png) image type, you will have access to some basic image editing tools (under 'Edit & Filters').

Among the many uses you may find, cropping your artwork may be the most useful, as it can save you money by getting rid of 'wasted space' in the image file.

Vector artwork cannot be edited or changed within the customizer app, and will require the use of 3rd party vector editing software, or additional graphic design services to correct any cropping issues.

Graphic optimization services are available for \$19.99 per graphic file.

The screenshot displays a product customizer interface. On the left, a blue binder cover is shown with a white laser-engraved tree graphic. A white dashed box indicates the current crop area, with a label '8.00 x 4.75 in' above it. On the right, an 'EDIT IMAGE' panel is visible, featuring a 'Crop' icon, a 'Width' field set to '8.00' and a 'Height' field set to '4.75' in inches, and an 'Update image' button. Below the binder image, the product description reads: '3-Ring Binder w/1" Slant Rings, 10 1/2" x 11 1/2", Laserable Leatherette, Laser Engraved \$41.98'. At the bottom right, there are buttons for 'SHARE', 'SAVE DESIGN', and 'ADD TO CART'.

## Chapter 4: Uploading Your Own Images

### Step 5: Uploaded image, cropped image

With the excess space surrounding the design cropped out, the total price is reduced, and pricing is determined solely on the design area\*.

Please be aware that uploading properly formatted, and cropped artwork is the responsibility of the customer, and no refunds, or invoice adjustments will be provided if artwork files are used that are not cropped, or formatted properly.

## Chapter 4: Uploading Your Own Images

### Step 6: Uploaded image, low resolution bitmap

If you upload a bitmap with less than 300ppi resolution, you will see this warning pop up.

Low resolution artwork can still be used in laser engraving, however, there will be some anticipated loss in optical quality/clarity. The ideal minimum resolution for bitmap image files is 300ppi (native, not upscaled).

Fun Fact: Resolution of most images commonly saved/downloaded from webpages are downscaled to 72ppi.

If needed/desired, graphic design services are available to create high resolution artwork files from low resolution source images, by quote only.

The screenshot shows a product customization interface for a 3-Ring Binder. The main area displays a blue binder with a white engraved design of stylized trees and a mountain range. A warning message is overlaid on the binder image, stating: "WARNING! Engraving, and printing quality may be negatively affected, when uploading bitmap artwork files that have a low resolution (less than 300ppi)." The interface includes a navigation menu, a search bar, and a price tag of \$37.98. The product description is: "3-Ring Binder w/1" Slant Rings, 10 1/2" x 11 1/2", Laserable Leatherette, Laser Engraved".

### Step 7: Photos, & images with color/gradients

Photos, and images with gradients don't typically make the greatest candidates for our laser engraved products, without additional graphic processing.

It is possible to use the color editor to remove unwanted colors to achieve a usable engraving file, however, this would not be considered a 'quality' photo engraving.

If photos are desired to be used in your engraving, when quality is vital to the finished product, we recommend going with our graphic design services, to create a high-quality engraving file (available by quote only).

### Step 8: Menu Options on Mobile

If you are using the customizer app on a mobile device, the menus and options will show up much differently to you.

For example, if you are uploading an image that has a background, the 'Recolor' menu won't automatically appear with the artwork selected.

With the artwork selected, you will see additional menu options at the bottom of your screen, so to remove the white background color, you would select the 'Recolor' menu, and then de-select the colors you want to remove from the live preview.

# Chapter 5:

---

## Advanced Customization Tools - Masks

### Step 1: Introduction to masks

Masks are a useful design tool, that basically create a clipping area, using shapes to hide, or expose specific parts of a design.

With masks, you can up your customization game, and create some cool effects that make a big impact!

With the artwork selected, we will focus on the 'Mask' tab, under the 'Edit Image' menu.

For this example, we will use a basic square shape to create our mask.

The screenshot displays a product customization interface. On the left, a dark grey book case is shown with a lion's head design. A square mask is applied to the design, with a label indicating its dimensions: "4.00 x 5.02 in". The right sidebar, titled "EDIT IMAGE", contains various editing tools. The "Mask" tab is selected, showing a "Shape" dropdown menu with "square" entered in the search field. Below the search field, several mask preview thumbnails are visible, with a mouse cursor hovering over one. At the bottom of the interface, the product details are listed: "Book Case with Handle & Zipper, 7 1/2" x 10 3/4" Laserable Leatherette, Laser Engraved \$50.98". Action buttons for "SHARE", "SAVE DESIGN", and "ADD TO CART" are also present.

### Step 2: Setting up your mask

Once you have selected your mask, you will see a change in tooling while the artwork is selected. You should see a green button, and an orange button.

The green button allows you to control/edit the artwork, and the orange button allows you to control/edit the mask.

With the orange button selected, you should see new handles (dark circles) appear on the boundary of the mask. These handles allow you to resize and shape your mask.

The screenshot displays a product customization interface. On the left, a dark grey book case is shown with a lion's head mask engraved on the front. The mask is labeled with dimensions: 4.00 x 5.02 in. Several control buttons are visible: a red button (top left), a green button (top right), an orange button (bottom right), and a red button (bottom left). A mouse cursor is hovering over the orange button. On the right, an 'EDIT IMAGE' panel is open, showing a preview of the lion's head and various settings. The 'Mask' tab is selected, showing a 'Shape' dropdown set to 'square' and a 'Stroke' dropdown set to '1'. Below the product image, the text reads: 'Book Case with Handle & Zipper, 7 1/2" x 10 3/4" Laserable Leatherette, Laser Engraved \$49.98'. At the bottom right, there are buttons for 'SHARE', 'SAVE DESIGN', and 'ADD TO CART'.

### Step 3: Adjusting your mask

When you have your mask adjusted and placed, you will notice the parts of the design that are to be hidden, or 'clipped' will appear slightly faded, and the visible part will remain unfaded.

Simply click the green button to exit the mask editor, and return to the design editor, if you want to resize/place/orient your artwork.

**IMPORTANT:** Set the Stroke on your mask to '0' so that you don't have an outline of your mask (unless that is something you want!)

The screenshot displays a product customization interface. On the left, a dark grey book case is shown with a lion's head design. A white dashed box highlights a portion of the design, with a label indicating its dimensions: "4.37 x 5.28 in". A green button with a white document icon is visible on the design, representing the mask editor. On the right, the "EDIT IMAGE" panel is open, showing a preview of the lion's head. Below the preview, the "Mask" tab is selected, and the "Stroke" is set to "0". The "Shape" dropdown is set to "square". At the bottom of the interface, there are buttons for "SHARE", "SAVE DESIGN", and "ADD TO CART".

Book Case with Handle & Zipper, 7 1/2" x 10 3/4" Laserable Leatherette, Laser Engraved  
**\$49.98**

### Step 4: Completing your mask

With the mask complete, we can select the artwork (green) button to return to our image editing function, and we can resize, place, orient our masked artwork, as we normally would.

At this point, we can add things like text, or additional images, or whatever we are going for to create our masterpiece!

The screenshot displays a product customization interface. On the left, a dark grey book case with a handle and zipper is shown. A black lion's head is centered on the cover, enclosed within a white rectangular mask. The dimensions of the mask are indicated as 3.31 x 7.43 in. Several interactive icons are overlaid on the book case: a red 'i' icon, a blue circular icon with a plus sign, a blue circular icon with a refresh symbol, a green square icon with a picture symbol, an orange square icon with a plus sign, and a blue circular icon with a plus sign. A mouse cursor is hovering over the bottom-right blue icon.

On the right side, the 'EDIT IMAGE' panel is visible. It includes a 'Replace' button, a 'Width' field set to 4.00, a 'Height' field set to 5.02 in, and a 'Shape' dropdown menu currently set to 'square'. Below these are options for 'Color' and 'Mask', and a 'Stroke' field set to 0. At the bottom of the interface, there are buttons for 'SHARE', 'SAVE DESIGN', and 'ADD TO CART', along with a shopping cart icon.

Book Case with Handle & Zipper, 7 1/2" x 10 3/4" Laserable Leatherette, Laser Engraved  
**\$51.98**

# Chapter 6:

---

## Advanced Customization - Variable Text

### Step 1: Orders containing varying names/dates

If you are ordering multiple items, with multiple names and/or dates, simply set one design for the entire order to create a 'template' and either include your list of names in your order notes, or alternately, you can send your list via email to: [sales@craftworksnw.com](mailto:sales@craftworksnw.com)

Please note that for each font style change, you will need to create a 'template' in the same manner, so for example, if you were using one font style for male names, and another font style for female names, you would need to set up two customizations.

A change in any design element, or style would require a new 'template' to be created.

**Etsy - Features, Limitations, & Restrictions**

## Step 1: Etsy customizer introduction

Due to limitations of the platform, the customizer app has had to be implemented in a very different way.

Customization occurs post-purchase, whereas on our website, it occurs pre-purchase.

Because of this, customization is limited in size, and area, and some features are locked behind a paywall (like image uploader tool set)

The screenshot shows the Etsy shop banner for CraftWorksNW, LLC. The banner features a collage of custom laser-engraved items: a white mug with a mountain logo, a pink mug with a circular logo, a red mug with a mountain logo, a black mug with a photo of a couple, and a blue mug with a mountain logo. The text on the banner reads: "CRAFTWORKS NW, LLC OUTLET SHOP CUSTOM LASER ENGRAVING FOR OUR COMPLETE CATALOG OF CUSTOMIZABLE LASER ENGRAVED, AND SUBLIMATION DYE GIFTS/PROMOTIONAL PRODUCTS, PLEASE VISIT OUR WEBSITE! 360.952.8196 https://craftworksnw.com". Below the banner is the shop profile for CraftWorksNW, which includes the shop name, location (Vancouver, Washington), sales count (10,262 Sales), and a 5-star rating. There is also an announcement section with the text: "We are excited to bring a new customizer tool to our Etsy customers! Now, YOU will have direct control over setting up your design through the use of an easy to use customizer app!".

## Step 2: Etsy customization options

1. **NONE** - Product is shipped blank, without any customization.
2. **DESIGNATED AREAS/SIZES** - Designated as 1-Side, Small, Front, etc. Product can be customized only with basic design tools (stock design library, text, and mask editors).
3. **UPLOAD YOUR OWN** - Product can be customized with all basic level tools, as well as the tools to upload your own artwork files. You will have full access to all available surfaces to personalize, without restriction.
4. **Set My Design For Me** - Paid mockup service. If you don't want to deal with the customizer tool, we will set your design up for you using our existing library, or your own graphic files.

No graphic design services are included, but are available by quote.

Set My Design For Me (\$54.39)

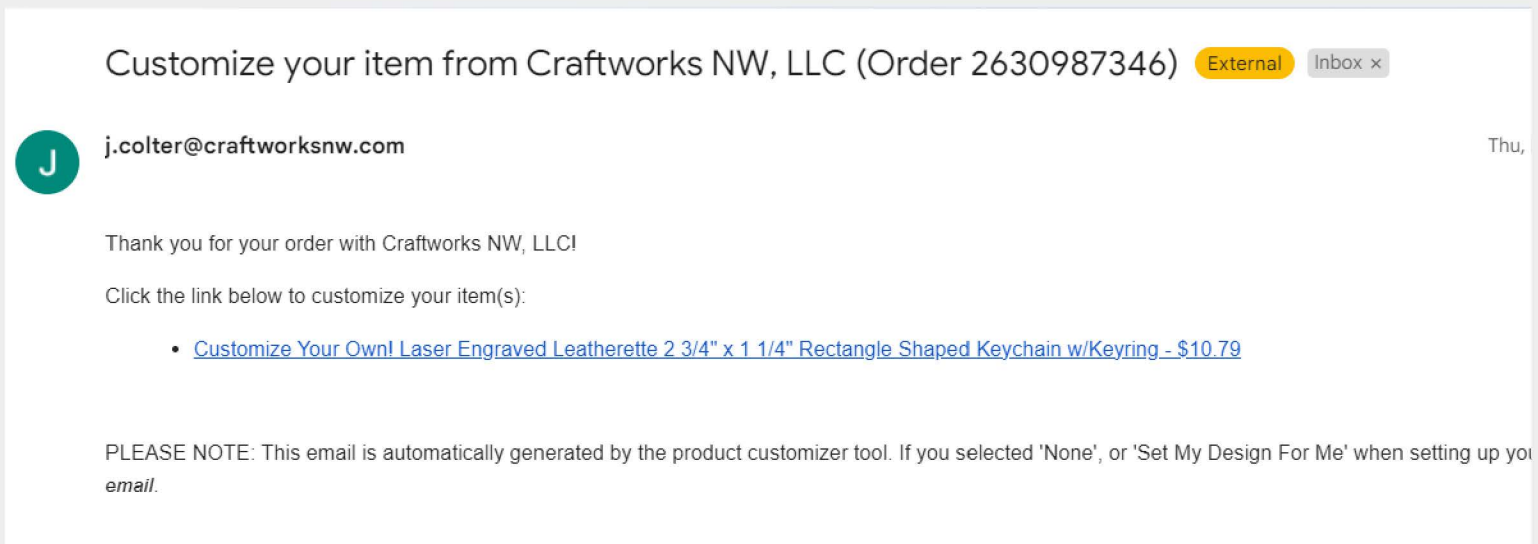

## Step 3: How it works

Soon after your order has been placed, you will receive a separate email that contains the link(s) to the product customizer tool.

It should look very similar to the image below. If you ordered multiple items, you will receive multiple customizer links in the same email.

If you do not receive this email, we advise checking your spam filter, and also verifying with us that the email address that this notification email is being sent to, is correct.

If 30 minutes goes by since your order was placed, and you have not received this email, reach out to us, and we will do a little troubleshooting with you to get the email to the right place!

## Step 4: Completing your customization

You should see a screen similar to this when you are submitting your customization for processing.

If you are ordering multiple items, you can specify the quantity within the order that a given design is applied to.

Please be aware that if you have ANY outstanding items that have not been customized, your order will still be considered as 'in process', and we will not be able to access your filework until ALL items within the order have been customized.

Ex: A customer who orders 6 bag tags, 5 of which receive the same design, and 1 is to get a different design, but for some reason the 1 tag has not been completed. That 1 tag will prevent the order from being able to be processed until it has been customized.

If you lose your place, or need to be resent the email links, contact us at [sales@craftworksNW.com](mailto:sales@craftworksNW.com) and we can resend the emails with the customizer links.

### Is this artwork valid for all the items in your order?

Since you have bought multiple pieces for the same product, you can decide to apply this design for all pieces or just a part of them and make a new design.

Use this design for  pieces.

You will be able to create up to 3 new designs after this one after you save your choice.
