Buy 25 +	40% Off
Buy 50 +	45% Off
Buy 100 +	50% Off

CUSTOMIZE

Step 2: Select the options for your tags (color, adhesive, mounting holes, quantity), and click the 'Customize' button to load the product customizer.

*If you are ordering multiple tags, with variable text, or data (serializations, etc), order the total quantity of tags that you will require, and customize a single tag to place your order. You can send us an email after your purchase that contains all of the data for your tags or, alternatively, you can download the pre-formatted .csv spreadsheet, fill it out, and submit it after your order has been placed.

If multiple tags are required, with variable text/data, download this .csv file, fill in the fields with your own data, and email the file to sales@craftworksnw.com with your order number in the subject line!

Step 3: When you open the customizer, you should see the following prompt to select a pre-designed template.

Please choose one of the pre-designed templates

Step 4: The templates are linked to the available mounting hole variants, and we only provide up to 5-Line presets. More lines can be added if needed, you will just need to add them manually in the customizer. Since we set this example up with a 4-Hole option, we will select the categories under 4 Holes in the pre-designed templates.

Please choose one of the pre-designed templates

If you don't select the pre-designed category that matches the option selected in the product page, it will not load correctly initially. (Skip ahead to Step 7 if this happens to you)

Step 5: Selecting the menu option will filter out the choices, and present you with a preview of the selected option.
Note that the preview image shows a tag, with 4 holes, and we have selected the 5-Line layout template.
This corresponds with the 4-Hole mounting option that was selected from the product listing page.

At this point, you can fully customize the tags, however, if you were ordering multiple tags with variable text/data, you can save time by setting a single design, creating the order, then supplying us with the list of tags separately via email once your order has been placed.
