

FULL DAY VSD TRAINING COURSES

ELECTRONIC DRIVES & CONTROLS

Example course schedule:

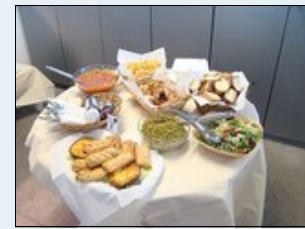

Full course: expected duration 9AM until 5PM in EDC's dedicated & spacious training suite in Erskine—or at your premises.

At EDC we like to settle our trainees with a morning breakfast roll (egg/ bacon/ lorne sausage/ black pudding etc) & provide tea, coffee, orange juice & Danish pastries before training commences. Mid morning we provide a hot & cold buffet lunch.

Course Materials: The day fee covers all course materials required (manuals etc), as well as meals—breakfast, lunch, snacks and a certificate of attendance.

Training : - VSD theory, drive start-up, parameter settings, extensive & practical fault finding , practical hands on learning (via EDC demo cases) VSD installation & commissioning,, energy saving applications, EMC issues, practical exercises & repair & maintenance of your on site inverters.

Question & answer session: Where your engineers can ask industry & application specific questions and find out best practice from our qualified & ABB trained engineers.
