

# PADHOLDER EDGE SERIES

## HOLDER SETUP AND TABLET INSTALLATION GUIDE

## SETUP

**A.** Loosen the two tensioners (a) and carefully attempt to slide your tablet in to the holder. Determine if you will need to change the installed spacers so your tablet, with or without it's case, fits firmly into the holder.

**B.** To change the installed spacers, use the included allen-wrench to remove the four (b) bolts on the face of the holder. Exchange the spacers with the proper size, re-install the bolts and attempt to fit your tablet once again.

**C.** Once the tablet fits firmly and fully seated in the holder, adjust the two tensioners so they sit against the sides of your tablet, then tighten them down.

**Note:** Keep tensioners installed unless you are using 0.75" or larger spacers. If so, swap the installed tensioners out with the longer tensioners and screws included in the package.
