See the Difference

All lenses are not the same; different lenses will not deliver the same image quality. Ensure you get the highest quality lenses to deliver the highest resolution, distortion-free imaging. The image below represents an actual side by side comparison of a Volk 20D lens and a non-Volk lens over a 2 mm grid. The photo is not retouched.

Our Promise

Volk is known worldwide as the premier designer and manufacturer of the highest quality ophthalmic lenses. The first aspheric indirect ophthalmoscopy lens was developed by Dr. David Volk 60 years ago. This led to the patented double aspheric designs of the 20D, 78D, and 90D lenses – the leading standards in the ophthalmic industry.

Continual improvement led to the evolution and development of our 2nd generation, the Super Series Lenses, and to the unsurpassed image quality you can achieve today with our 3rd generation, the Digital Series Lenses.

Volk’s unmatched image quality can be appreciated across our comprehensive range of imaging products, including gonio lenses, direct and indirect laser lenses, and a full range of surgical and diagnostic imaging products.

Classic BIO Lenses

Aspheric ophthalmic lenses were developed by Dr. David Volk in 1956, correcting aberrations induced by the then-common spherical lenses.

Several developments occurred with the aspheric lens designs through the years, delivering far superior imaging for BIO examinations. In 1982, all Volk lenses for indirect ophthalmoscopy were redesigned with both surfaces aspheric, providing a substantial improvement in image quality.

The 20D and other Volk BIO lenses have been known as the industry standard for decades, and are still widely used in every corner of the world today.

**Macula Plus® 5.5**

Primary Application – Ultra-High Magnification View of the Central Retina
- Excellent stereo imaging for diagnosis of macular abnormalities
- High magnification facilitates examination of geriatric patients
- Lens adapter provides stability with extended working distance

Product code: VMP5.5

**14D**

Primary Application – High Magnification Viewing of the Posterior Pole
- High magnification provides excellent imaging of the macula and optic disc
- Detailed view of the optic disc facilitates glaucoma screening examination

Product code: V14LC
15D
Primary Application – High Magnification Viewing of the Posterior Pole
• High magnification allows thorough examination of the macula and optic disc
• Detailed view of the optic disc facilitates glaucoma screening

Product code: V15LC

20D
Primary Application – Industry Standard General Diagnostic Lens
• Perfect balance of magnification and field of view makes this lens well suited for general diagnostic exams
• Also available in autoclave sterilizable (ACS®) design (see page 32) or single-use design (see page 36)

Available in 7 different colors
(shades may vary)

Product code: V20LC

Pan Retinal® 2.2
Primary Application – Excellent for General Diagnosis and Treatment
• Balance of magnification and field of view for general diagnosis
• Examine through small pupils

Available in 7 different colors
(shades may vary)

Product code: VPRC

25D
Primary Application – Mid-Peripheral Diagnosis and Treatment
• Field of view extends from the central to the mid-peripheral retina
• Smaller diameter facilitates manipulation within the orbit

Product code: V25LC
**28D**

Primary Application – Ideal for Fundus Scanning
- Excellent for small pupil diagnosis and treatment
- Available in autoclave sterilizable (ACS®) design (see page 32) or single-use design (see page 36)

Product code: V28LC

Available in 7 different colors (shades may vary)

**30D Small**

Primary Application – Small Pupil and Pediatric Examination
- Optical design delivers high resolution views through a small pupil
- Small profile lens for ease of use within the orbit during examination

Product code: V30SC

**30D**

Primary Application – Small Pupil and Pediatric Examination
- Optical design delivers high resolution views through a small pupil
- Dynamic BIO exam yields a field of view slightly wider than the mid-peripheral retina

Product code: V30LC

**40D**

Primary Application – Low Mag Scanning out to the Far-Peripheral Retina
- Widest field of view available in a BIO lens
- Great for small pupil and pediatric exams

Product code: V40LC
Digital Series BIO Lenses

The digital series BIO lenses are a result of Volk’s spirit of innovation and undying commitment to optical excellence. The double aspheric design was further improved using advanced modeling techniques coupled with low-dispersion glass thereby reducing chromatic aberrations to provide superior high definition images. Advanced A/R coating reduces reflections and glare up to 50% more than traditional A/R coatings.

Digital Clear Field | Next Gen 20D
Primary Application – High Resolution Retinal Exam
• 20% wider field of view than the Classic 20D lens
• High resolution view from the central to the mid-peripheral retina, even through small pupils

Product code: VDGTLCF

Digital Clear Mag | Next Gen 14D/15D
Primary Application – High Resolution Exam of the Posterior Pole
• With a similar field of view, upgrading to the Digital Clear Mag is an easy transition from the Classic 14D or Classic 15D
• High resolution view from the central to the mid-peripheral retina

Product code: VDGTLCM
From starting the revolution of slit lamp fundus examination to establishing the standard of retinal examination, Volk has been committed to providing you with the right tools to diagnose and treat ocular pathologies.

A series of indirect ophthalmoscopy lenses were developed, resulting in the choice of the 90 Diopter lens as the most practical for indirect ophthalmoscopy with the slit lamp. The Volk 60D and 90D lenses were commercialized providing a variety of characteristics: magnification, field of view, and undilated pupil examination.

60D
Primary Application – High Magnification View of the Posterior Pole
• High magnification lens for detailed optic disc and macula imaging
• Ideal diameter for use in the orbital area

Product code: V60C

78D
Primary Application – General Diagnosis and Laser Treatment
• Ideal balance of magnification and field of view
• Optimally designed for use within range of motion of all slit lamps

Product code: V78C

90D
Primary Application – General Diagnosis and Small Pupil Examinations
• Original 90D lens that started the slit lamp fundus examination revolution
• Small diameter ring is ideal for dynamic fundoscopy
• Outstanding general diagnostic lens, even through small pupils

Product code: V90C

Available in 7 different colors (shades may vary)
Super Series Slit Lamp Lenses

Our drive to improve indirect imaging at the slit lamp led us to develop our 2nd Generation slit lamp lenses: The Super Series. Working with high grade glass types, we reviewed and improved the double aspheric designs which were so successful in the classic 90D, 78D and 60D lenses, to bring you the Super Series. A group of four lenses was developed to deliver wide field, high magnification, and specialty features such as unsurpassed small pupil capabilities – the full diagnostic spectrum!

Super 66®
Primary Application – High Magnification Viewing of the Central Retina
• Enables 3D discernment of subtle macular and optic disc details
• 1.0x magnification simplifies optic disc measurement

SuperField®
Primary Application – Wide Field Pan Retinal Examination
• The “Super 90D” – same magnification with a wider field of view
• Combines a wide field of view with a comfortable working distance

Super VitreoFundus®
Primary Application – Wide Field Pan Retinal Examination
• Widest field of view in a non contact lens with views past the vortex
• Excellent small pupil capability through a 3–4 mm pupil

SuperPupil® XL
Primary Application – Small Pupil Pan Retinal Examination
• Optimal small pupil capability through a pupil as small as 2–3 mm
• Excellent for funduscoppy through a miotic pupil
Volk has taken double aspheric lenses to the next level with our 3rd Generation slit lamp lenses: The Digital Series. Similar to the Digital BIO lenses, we combined advanced engineering techniques with higher grades of glass to produce detailed views of the retina that were previously unattainable at the slit lamp. Our Digital Series slit lamp lenses are equipped with an advanced A/R coating that reduces reflections and glare by up to 50%, as compared to a traditional coating.

Whether you're looking for a wider field of view or higher magnification, Volk's Digital Series slit lamp lenses have you covered. The Digital Wide Field®, Digital High Mag®, and Digital 1.0x Imaging Lens offer the highest image resolution available.

</table>
Digital Wide Field® | 3rd Generation 90D
Primary Application – High Resolution Pan Retinal Exam
• 40% more field of view than Classic 90D, the widest field of view available in a non-contact lens
• Enhanced double aspheric design paired with high index glass ensures highest resolution stereo image, even through small pupils

Digital High Mag® | 3rd Generation 60D
Primary Application – High Resolution, High Magnification Retinal Exam
• High magnification, along with outstanding stereopsis, provide detailed views of the optic disc, the optic nerve, and the retinal nerve fiber layer making this lens ideal for glaucoma screening
• Image magnification of 1.30x is the highest magnification available in a non-contact slit lamp lens

Digital 1.0x Imaging Lens
Primary Application – Digital Slit Lamp Photography
• Unique glass surface curves and coating minimize photographic distortion and reflections
• 1.0x magnification simplifies optic disc measurements
• High index, high resolution glass allows improved stereopsis and image clarity
Indirect Contact Laser Lenses

Volk’s range of indirect contact laser lenses are designed to provide retinal images and are ergonomically designed keeping both practitioner and patient comfort in mind.

Our exclusive Advanced No Fluid (ANF+) contact design provides optimal stability during examination without the need for contact fluid. However, it may be beneficial to utilize a lubricating fluid for patient comfort. This contact design should not be used for laser procedures.

We recommend using flanged versions when using a laser. Flanged versions provide optimal stability on the cornea. A coupling fluid should be used with our flanged laser lenses.

No flange (NF) versions of our lenses have a smaller corneal contact area than our flanged versions. A coupling fluid should be used with our no flange (NF) lenses.

Super Quad® 160
Primary Application – Wide Field of View for Pan Retinal Examination and Laser Treatments
- Wide field views for complete retinal imaging out to the ora serrata
- Excellent for PRP and other laser treatments out to the far-peripheral retina

Product code:
With Flange: VSQUAD160
No Flange: VSQUAD160NF

HR Wide Field
Primary Application – Wide Field of View for Pan Retinal Examination and Laser Treatments
- Same field of view and image magnification as the Super Quad® 160 but at half the size and half the weight
- Low-dispersion glass reduces chromatic aberrations and ensures excellent imaging to the ora serrata

Product code:
With Flange: VHRWF

QuadrAspheric®
Primary Application – Wide Field of View for Pan Retinal Examination and Laser Treatments
- High resolution imaging of the peripheral retina with small pupil capability
- Excellent general diagnostic and laser treatment lens

Product code:
With Flange: VQFL
No Flange: VQFLNF
ANF+ Flange: VQFLANF+

Area Centralis®
Primary Application – High Magnification Examination and Treatment of the Posterior Pole
- Ideal for focal/grid laser treatment
- High magnification image of the posterior pole with expanded field of view

Product code:
With Flange: VAC
No Flange: VACNF
ANF+ Flange: VACANF+

HR Centralis
Primary Application – High Magnification Examination and Treatment of the Posterior Pole
- Low-dispersion glass and advanced double aspheric design produces a high resolution view out to the peripheral retina
- Excellent capability with pupils as small as 4 mm

Product code:
With Flange: VHRC
Super Macula® 2.2
Primary Application – High Magnification Examination and Treatment of the Posterior Pole
• Highest magnification imaging of the posterior pole of any indirect contact lens
• Excellent for critical evaluation of the optic nerve head and macula

Product code:
With Flange: VSMAC2.2

TransEquator®
Primary Application – Mid-Peripheral Retinal Diagnosis and Focal/Grid Laser Therapy
• Wide field of view past the equator for pan retinal imaging and treatment
• Excellent substitute for Rodenstock pan fundus lens
• Available in numerous contact options including our exclusive advanced no fluid (ANF+)

Product code:
With Flange: VTE
No Flange: VTENF
ANF+ Flange: VTEANF+

Equator Plus®
Primary Application – Small Pupil Diagnosis and Treatment
• Optimally sized to maximize maneuverability in the orbit
• High resolution wide field imaging with small pupil capability
• Available in numerous contact options including our exclusive advanced no fluid (ANF+)

Product code:
ANF+ Flange: VEPANF+
No Flange: VEPNF

Quad Pediatric
Primary Application – Retinopathy of Prematurity and Pediatric Diagnosis and Treatment
• Patented double aspheric glass optics provide enhanced imaging
• Miniaturized contact diameter ideal for diagnosis and treatment of ROP and other infant conditions
• Excellent for treatment of patients with narrow palpebral fissures

Product code:
With Flange: VQPED

PDT Laser
Primary Application – Photodynamic Therapy
• Delivers maximum laser spot size for treatment of the choroidal neovascular membranes
• Ideal combination of magnification and field of view to facilitate PDT procedures
• Optimized A/R coating for 689 nm wavelength used for PDT procedures

Product code:
With Flange: VPDT
Direct Contact Laser Lenses

Volk's fundus laser lenses provide high resolution views of the fundus for treatment of the posterior pole.

Flanged versions provide optimal stability on the cornea.

Our exclusive advanced no fluid (ANF+) flange is designed to provide optimal stability during examination without the need for contact fluid. However, it may be beneficial to utilize a lubricating fluid for patient comfort. A standard fluid, flanged contact option is recommended for laser procedures. (VCDANF+ is flanged, but still not sufficient for laser use.)

Centralis Direct®
Primary Application – Direct Image Viewing and Treatment of the Posterior Pole
- High profile design eliminates filament reflection
- Optimized aspheric corneal contact design for improved fit and maneuverability
- Available in both flanged and advanced no fluid (ANF+) flanged designs

Product code:
VCD
VCDANF+

Fundus Laser
Primary Application – Direct Image Viewing and Treatment of the Posterior Pole
- Patented double aspheric glass optics provide enhanced imaging
- Superior high magnification viewing and treatment of the posterior pole and macula
- Laser Window protects imaging element from contamination ensuring precise laser spot placement

Product code:
VFUNDUS

Fundus Laser 20 mm
Primary Application – Direct Image Viewing and Treatment of the Posterior Pole
- Superior highest magnification viewing and treatment of the posterior pole and macula
- Laser Window protects imaging element from contamination ensuring precise laser spot placement
- Large contact element provides superior stability

Product code:
VFUNDUS20
Specialty Treatment Lenses

Volk’s range of specialty treatment lenses are specially crafted for laser treatment of the anterior segment ocular pathologies. Experience precision and clarity like never before with our capsulotomy and iridotomy lenses.

**Singh MidVitreous**
Primary Application – Laser Treatment of Vitreous Floaters
- Enables clear visualization of vitreous floaters from the posterior capsule to the retina
- Unique flanged contact element provides stability during laser procedures and is ideal for patients with small palpebral fissures

Product code: VSMV

**Idrees MidVitreous**
Primary Application – Laser Treatment of Vitreous Floaters
- Tall lens body makes this the preferred lens for treating patients with deep set eyes
- Flanged contact element provides stability during laser procedures

Product code: VIMV

**Rapid SLT™**
Primary Application – SLT Procedures
- Four-mirror design reduces the time taken for the SLT procedure by half
- Simultaneously visualize of all quadrants of the trabecular meshwork

Product code: VMSLT

**Selective Laser Trabeculoplasty (SLT)**
Primary Application – SLT Procedures
- 1.0x magnification maintains laser spot size and power density at the treatment site
- Large internally reflective facet provides excellent view of the angle

Product code: VSLT
Capsulotomy
Primary Application – Laser Capsulotomy Procedures
- Enables precise focusing of the laser beam at the posterior lens capsule
- Laser Window provides a protective barrier for internal imaging components

Product code: VCAPS

Blumenthal Iridotomy
Primary Application – Far Periperal Laser Iridotomy Procedures
- Unique contact design allows indentation to open the angle and flatten the peripheral iris
- Improved lens performance uses lower energy for less iris tissue damage and post laser inflammation
- Larger lens housing aids manipulation and allows more oblique viewing
- Aspheric lens element provides superior optical quality for sharply focused laser spots

Product code: VBIRID

MagPlus Iridectomy
Primary Application – Laser Iridotomy Procedures
- Larger offset viewing area delivers superior clarity and resolution with larger laser spot size
- Laser Window protects imaging element from contamination ensuring precise laser spot placement

Product code: VMPIRID

Iridectomy
Primary Application – Laser Iridotomy Procedures
- High magnification of the iris ensures precise placement of the laser beam
- Laser Window provides a protective barrier for internal imaging components

Product code: VIRID

Blumenthal Suturelysis
Primary Application – Suturelysis Procedures
- Unique pointed tip reduces compressive force needed to visualize sutures, reducing patient discomfort
- High magnification enables treatment of deep seated sutures
- Unique design facilitates visualization through thick Tenon’s layer or a subconjunctival hemorrhage

Product code: VBSL
Gonio Lenses

Volk’s Gonio Lenses are the industry standard for performing static, dynamic, and indentation gonioscopy. Our no flange G-Series lenses (G-1, G-2, G-3, G-4, and G-6) have a small contact area which maximizes patient comfort and minimizes corneal wrinkling during dynamic exams.

The standard flange contact on our G-Series and the no flange style of our 3-Mirror lens provides optimal stability and control on the cornea during laser procedures. A coupling fluid must be used with our 3-Mirror, no flange gonio lens.

Every glaucoma specialist should have at least one of Volk’s gonio lenses in their portfolio.

Note:
A coupling fluid should always be used with the flanged version of our G-Series gonio lenses.

No flange (NF) versions have a small corneal contact area and are excellent for diagnostic work. It may not be necessary to use a contact fluid with these versions (G-Series gonio lenses only). A coupling fluid should be used with our 3-Mirror, no flange gonio lens.
G-1 Gonio
1-Mirror, All-Glass Design
• High magnification (1.50x) enables detailed viewing of the trabecular meshwork
• All-glass design provides superior clarity and durability
• Available in two formats: flanged (recommended for laser trabeculoplasty) and no flanged (recommended for routine gonioscopy)

Product code:
Flange: VG1 (as shown)
No Flange: VG1NF

G-2 Gonio
2-Mirror, All-Glass Design
• High magnification (1.50x) combined with dual mirror angles (60°/64°) allows for both a detailed and a broad view of the anterior chamber
• All-glass design provides superior clarity and durability
• Available in two formats: flanged (recommended for laser trabeculoplasty) and no flanged (recommended for routine gonioscopy)

Product code:
Flange: VG2 (as shown)
No Flange: VG2NF

G-3 Gonio
3-Mirror, All-Glass Design
• 60° mirror provides a view of the iridocorneal angle
• 66° mirror provides a retinal image from the equator to the ora serrata
• 76° mirror provides a view of the mid-peripheral/peripheral retina
• Available in two formats: flanged (recommended for laser trabeculoplasty) and no flanged (recommended for routine gonioscopy)

Product code:
Flange: VG3
No Flange: VG3NF (as shown)
Gonio Mini, No Flange: VG3MININF (as shown)

Available in mini version for pediatric and patients with small orbits

3-Mirror
Primary Application – 3-Mirror, Acrylic Design
• 3-mirror design provides the same views as our G-3 Gonio lenses but in a light weight acrylic design
• Uncoated lenses are ideal for diagnostic exams while coated lenses are perfect for laser treatments
• Advanced no fluid (ANF+) flange only requires a coupling fluid during laser procedures

Product code:
No Flange: V3MIR (as shown)
ANF+ Flange: V3MIRANF+
No Flange, No Coating (Diagnostic): VU3MIR
ANF+ Flange, No Coating (Diagnostic): VUSMIRANF+
G-4 Gonio
4-Mirror, All-Glass Design
- 4-mirror design allows for comprehensive examination and treatment of the trabecular meshwork with minimal lens rotation
- Available with a large ring (28.5 mm), a small ring (25.5 mm), or a 2-position handle (right/left handed)
- No flange version is ideal for dynamic and indentation gonioscopy while flanged version provides stability for laser trabeculoplasty

Product code:
- With Flange: VG4 (as shown)
- No Flange, Small Ring (25.5 mm): VG4SNF
- No Flange, Large Ring (28.5 mm): VG4LNF
- No Flange, Extended Handle: VG4HAN2

G-4 High Mag Gonio
4-Mirror, All-Glass Design
- 50% more image magnification than our classic G-4 Gonio enables more detailed viewing of the trabecular meshwork
- Available with a large ring (28.5 mm), a small ring (25.5 mm), or a 2-position handle (right/left handed)
- No flange version is ideal for dynamic and indentation gonioscopy while flanged version provides stability for laser trabeculoplasty

Product code:
- With Flange: VG4HM (as shown)
- No Flange, Small Ring (25.5 mm): VG4HMSNF
- No Flange, Large Ring (28.5 mm): VG4HMLNF
- No Flange, Extended Handle: VG4HMHAN2

Mini 4-Mirror
4-Mirror, Acrylic Design
- Smaller, lighter-weight design facilitates easy manipulations within the orbit
- Advanced no fluid (ANF+) flange does not require coupling fluid during routine gonioscopy

Product code:
- V4MANF+

G-6 Gonio
6-Mirror, All-Glass Design
- 6 closely-aligned mirrors create a panoramic view of the anterior chamber and minimize the need for dynamic gonioscopy
- Available with a large ring (28.5 mm) or a 2-position handle (right/left handle)

Product code:
- No Flange, Large Ring (28.5 mm): VG6LNF
- No Flange, Extended Handle: VG6HAN2

**VVG Lens**
Primary Application – Direct Views for Micro-Invasive Glaucoma Surgery (MIGS) and all Intraoperative Gonio Procedures
- Stabilization ring provides control of the globe
- Minimizes corneal pressure to prevent anterior chamber distortion
- Visualizes angle in primary phaco position with minimal microscope and head adjustments
- Fully steam sterilizable

**Product code:** VTSVVG

![2D View](image1)

**Surgical Gonio Lens**
Primary Application – Direct Views for Intraoperative Gonio Procedures
- Lens position can be adjusted relative to the handle: for left hand and right hand or center position
- Applicable for MIGS procedures
- Sterilizable by either steam autoclave or ethylene oxide (ETO)

**Product code:** VSGACS

![2D View](image2)
Experience unmatched image quality and focusing capability with Volk's single-use laser and gonio lenses. Single-use lenses are perfect for routine examination, laser treatments, and surgical procedures.

Volk's single-use lenses are pre-sterilized and individually-packaged in a Tyvek® pouch. Single-use lenses are sold in boxes of 10.

**Volk®1 Single-Use Capsulotomy**
Primary Application – Laser Capsulotomy Procedures
- Facilitates accurate laser beam focus on the posterior lens capsule

**Product code:** VCAPSD10

**Volk®1 Single-Use Iridotomy**
Primary Application – Laser Iridotomy Procedures
- Magnified view of the peripheral iris enables precise laser placement for iridotomy procedures

**Product code:** VIRIDD10

**Note:** Capsulotomy and Iridotomy lenses are suitable for argon, diode and YAG laser treatments.

**Volk®1 Single-Use SLT**
Primary Application – SLT Procedures, Static and Dynamic Gonioscopy
- Single-mirror lens angled at 63° ensures proper laser placement during Selective Laser Trabeculoplasty
- Single-use SLT lens can also be used for ALT procedures

**Product code:** VSLTD10

**Volk®1 Single-Use 3-Mirror Gonio**
Primary Application – Gonioscopy and Examination of the Central and Peripheral Fundus
- 60° mirror provides a view of the iridocorneal angle
- 66° mirror provides a retinal image from the equator to the ora serrata
- 76° mirror provides a view of the mid-peripheral/peripheral retina

**Product code:** V3MIRD10

**Volk®1 Single-Use 4-Mirror Gonio**
Primary Application – Static and Dynamic Gonioscopy
- Four-mirror design allows for comprehensive examination and treatment of the trabecular meshwork with minimal lens rotation

**Product code:** V4MIRD10
Diagnostic Imaging Devices
The Pictor Plus portable ophthalmic camera can take your practice places. From the exam room to on-location screenings, nursing home calls and everywhere in between.

Two easily interchangeable modules provide high resolution retinal (non-mydriatic) or external eye imaging.

- **Retinal Module** - Pictor Plus retinal imaging enables non-mydriatic fundus examination with a 40° field of view. With digital still and video images, the appearance of optic disc, macula and retinal vasculature can be screened and documented for ocular lesions and anomalies.

- **Anterior Module** - Pictor Plus anterior imaging provides high-resolution images of the surface of the eye and areas directly surrounding the eye. The cobalt blue LED light allows fluorescent imaging to detect a dry eye or any trauma on the ocular surface.
Digitize your fundus exam with iNview. Leverage the power and convenience of the Apple iPhone with the trusted quality of Volk optics.

 Quickly & effortlessly capture fundus images for visualization & patient education. Helps facilitate patient discussions related to disease progression and treatment plan.

- Free mobile application available in the Apple App Store (search Volk iNview)
- Offers 1 Megapixel resolution with a static 50° field of view
- View the peripheral retina dynamically out to 80°
- Available auto-capture & manual capture imaging modes
- Mydriatic; requires minimum 5mm pupil
- HIPAA-compliant storage and export from iPhone to PC or Mac
- Compatible in Apple iPhone 6s/6/5s and iPod Touch (Gen 6) modules
Surgical Viewing Systems & Surgical Lenses
The MERLIN® Surgical System is the finest system for noncontact vitreoretinal visualization. Using Volk’s proprietary double aspheric lens technology, MERLIN® delivers unmatched image resolution and depth-of-field, superior to any other non-contact system.

The MERLIN® system features an exclusive Condenser Lens Assembly (CLA) that slides a condenser lens into the optical train when the system is engaged. The condenser lens minimizes the need for refocusing of the microscope. It also features an anti-reflection coating that significantly improves light transmission, reducing the risk of phototoxicity.

The unique design of the Lens Positioning Unit (LPU) is precisely aligned to the optical axis of the microscope and offers a simple pivoting mechanism that folds away when not in use. An intuitive fine focus wheel provides smooth, graduated adjustment to optimally position the lens.

3 Options to Suit Your Lens Needs

All MERLIN® lenses are designed using Volk’s proprietary double aspheric lens technology. Built with PermaView™ glass, lenses withstand repeat steam sterilization without degradation. Each lens is equipped with a hinge mechanism to ensure patient safety in case of accidental contact.

- Smallest diameter lens, ideal for patients with small pupils or deep seated eyes, and pediatric cases
- Provides a very wide field of view, while maintaining superior clarity and depth of field
Reinverting Operating Lens System® (ROLS®)

The ROLS® is an advanced panoramic viewing system that provides reinverted viewing during vitreoretinal surgery, delivering high resolution, direct retinal images. ROLS® is compatible with all surgical microscopes for viewing the retina with indirect contact surgical lenses and the non-contact surgical viewing system.

ROLS® ∞ (Infinity)

The ROLS∞ is our newest reinverter and provides superior image quality with minimal image shift. It is available in manual and powered versions. The powered version works with the Merlin surgical system, engaging automatically when the LPU is pivoted into place. The powered version can also be operated by an available footswitch.
Surgical Vitrectomy Lenses

Volk offers a variety of vitrectomy lenses over a range of optical profiles and efficiently built to cater to various vitrectomy procedures.

**HRX Vit Lens**
Primary Application – Far-Peripheral Indirect Vitreoretinal Procedures
- High index glass delivers widest field, distortion free retinal views of any surgical lens
- Small profile ring facilitates instrument manipulation and surgical procedures
- Available in standard and patented self stabilizing contact (SSV®) options
- Ideal for retinal detachments and giant retinal tears

Product code:
VHRXVIT
Self Stabilizing: VHRXVITSSV (as shown)

**Mini Quad® XL**
Primary Application – Indirect Viewing and Treatment of Peripheral Retinal Disorders
- Wide field of view of the entire retina including the ora serrata
- Ideal for retinal detachments and giant retinal tears
- Available in standard and self stabilizing contact (SSV®) options

Product code:
VMQXVLVIT (as shown)
Self Stabilizing: VMQXVLVITSSV
Mini Quad®
Primary Application – Indirect Viewing and Treatment of Peripheral Retinal Disorders
• Wide field of view of the entire retina including the ora serrata
• Smaller ring facilitates manipulation within the orbit
• Ideal for retinal detachments and giant retinal tears
• Available in standard and self stabilizing contact (SSV®) options
• Available in autoclave sterilizable design (see page 33)

Product code:
VMQVIT (as shown)
Self Stabilizing: VMQVITSSV

DynaView
Primary Application – Treatment of Retinopathy of Prematurity
• Enhanced design provides wide field imaging out to the ora serrata
• Minified housing facilitates extension of instruments
• Reduced contact size ideal for pediatric examination

Product code:
VDVVIT

Central Retinal
Primary Application – High Magnification Indirect Viewing and Treatment of the Central Retinal
• High resolution, high magnification imaging to the equator
• Ideal for membrane peeling, retinal tears and other small detail procedures
• Available in standard and self stabilizing contact (SSV®) options
• Available in autoclave sterilizable design (see page 33)

Product code:
VCRLVIT (as shown)
Self Stabilizing: VCRLVITSSV

Super Macula®
Primary Application – Highest Magnification Indirect Viewing and Treatment of the Central Retinal
• High resolution, highest magnification imaging of the central retina
• Ideal for macular holes, epiretinal membranes, and submacula surgery
• 2x field of view compared to plano/concave direct image lenses

Product code:
VSMACVIT
Volk's high resolution direct image lenses utilize a high index glass to deliver superior image quality. This robust glass type is highly resistant to the rigors of continued steam sterilization and will not deteriorate or discolor.

Volk's No Stabilizing Ring (NSR) range of lenses allow suitable stability without the need for suturing or stabilizing rings. Two of the lenses in the group are also available in a no suture ring design. The profiles of these two lenses allows them to stabilize suitably without the need for an additional stabilizing ring.

**HR Direct 1x**

Primary Application – Direct Image Vitreoretinal Surgery of the Central Retina

- High index glass delivers highest resolution direct image of the central retina
- Highly suited for repeated steam sterilization with no material degradation
- Standard design fits all major suture rings
- Unique optional no stabilizing ring (NSR) design available

**Product code:**
- Stabilizing Ring: VHRD1XACS
- No Stabilizing Ring: VHRD1XNSRACS

---

**HR Direct Bi-Concave**

Primary Application – Wide Field and AFX (Air Fluid Exchange) Direct Image Vitreoretinal Surgery

- High index glass in a bi-concave design delivers highest resolution imaging for wide field and AFX procedures
- Highly suited for repeated steam sterilization with no material degradation
- Standard design fits all major suture rings

**Product code:** VHRDBCACS

---

**HR Direct High Mag**

Primary Application – High Magnification Direct Image Vitreoretinal Surgery of the Central Retina

- High index glass delivers highest resolution, high magnification of the central retina
- Highly suited for repeated steam sterilization with no material degradation
- Standard design fits all major suture rings
- Unique optional no stabilizing ring (NSR) design available

**Product code:**
- Stabilizing Ring: VHRDHMACS
- No Stabilizing Ring: VHRDHMNSRACS

---

**HR Direct 20° Prism**

Primary Application – Off Axis Wide Field Direct Image Vitreoretinal Surgery

- High index glass delivers highest resolution off axis (20°) direct image retinal views
- Improved design delivers wider field (40°) off axis views
- Highly suited for repeated steam sterilization with no material degradation

**Product code:** VHRD20PACS
Autoclavable Surgical BIO Lenses

Combine the optical excellence of Volk lenses with the comfort of reduced processing time in a surgical environment with the autoclavable lens line.

**HRX ACS®**
Primary Application – Widest Field Views for Vitreoretinal Procedures
- Superior high index glass design ensures widest field views of any vitrectomy lens
- Advanced aspheric design provides unmatched high resolution imaging
- Steam sterilizable for reduced processing time

**Mini Quad® ACS®**
Primary Application – Peripheral Indirect Vitreoretinal Procedures
- Steam sterilizable for reduced processing time
- Smaller ring facilitates manipulation within the orbit
- Ideal for retinal detachments and giant retinal tears

**Central Retinal ACS®**
Primary Application – High Magnification Indirect Vitreoretinal Procedures
- High resolution, high magnification imaging to the equator
- Steam sterilizable for reduced processing time
- Ideal for membrane peeling, retinal tears and other small detail procedures

**Direct Image Flat SSV® (ACS®)**
Primary Application – Routine Direct Image Vitreoretinal Surgery of the Central Retina
- Delivers high resolution direct image of the central retina
- Steam sterilizable for reduced processing time

Product code: VFLATSSVACS

**Direct Image High Mag SSV® (ACS®)**
Primary Application – High Magnification Direct Image Vitreoretinal Surgery of the Central Retina
- Delivers high resolution, high magnification direct image of the central retina
- Steam sterilizable for reduced processing time

Product code: VFHMSSVACS

**Direct Image Mid Field SSV® (ACS®)**
Primary Application – Wide Field Direct Image Vitreoretinal Surgery
- Bi-concave design provides widest field available in a direct image lens
- Can be used for air/gas exchange procedures
- Steam sterilizable for reduced processing time

Product code: VMFSSVACS
Direct Image 15° Prism SSV® (ACS®)
Primary Application – Off Axis Direct Image Vitreoretinal Surgery
- Design delivers 15° off axis retinal views
- Steam sterilizable for reduced processing time

Product code: VPRISMSSVACS

Direct Image 30° Prism SSV® (ACS®)
Primary Application – Off Axis Direct Image Vitreoretinal Surgery
- Design delivers 30° off axis retinal views
- Steam sterilizable for reduced processing time

Product code: V30PRISMSSVACS

Direct Image 45° Prism SSV® (ACS®)
Primary Application – Off Axis Direct Image Vitreoretinal Surgery
- Design delivers 45° off axis retinal views
- Steam sterilizable for reduced processing time

Product code: V45PRISMSSVACS

Direct Image AFX SSV® (ACS®)
Primary Application – Direct Image Vitreoretinal Surgery During Air Fluid Exchange Procedures
- Delivers high resolution central retinal imaging
- Steam sterilizable for reduced processing time

Product code: VAFXSSVACS
Volk®1 single-use surgical BIO lenses combine high-quality optics that Volk is known for and the convenience of pre-sterilization into a ready-to-use design. Volk’s single-use surgical BIO lenses enable convenient pre- and post-operative examination and laser treatment.

Single-use lenses are pre-sterilized and individually-packaged in a Tyvek® pouch. Single-use lenses are sold in boxes of 10.

**Volk®1 Single-Use 20D**
Primary Application – Industry Standard Diagnostic Lens in a Single-Use Format
- Perfectly balanced magnification and field of view make this lens ideal for general diagnostic examination

Single-Use Surgical Direct Image Vitrectomy Lenses

Available in six popular styles, these lenses deliver high resolution direct-image retinal views for all vitrectomy procedures. The SSV® (self stabilizing) contact design eliminates the need for sutures or rings, designed in collaboration with K.V. Chalam, MD. They are packaged individually in an easy to open peel pack and are boxed in quantities of 10 lenses.

Research Lenses

**Fundus Lens**
Provides high resolution views of the posterior pole. Its upper surface has an A/R coating to minimize reflections and glare and maximize laser throughput. The contact surface is conically shaped to facilitate placement and does not require viscous coupling fluid. Its handle is fixed at 45°.

**Glass Gonio Lens**
Provides high resolution views of the anterior chamber angle structures with four equally angled mirrors. Views of the optic nerve and posterior retina can be obtained through the center of the lens. The small contact surface does not require viscous coupling fluid. Its handle may be fixed in two positions: straight or at a 45° angle.

**Volk Accessories**

**Volk Lens Pen®**
Primary Application – Dry Cleaning of Coated Ophthalmic Lens Surfaces
- Carbon based cleaning pad wipes away smudges and reduces static build up
- Cost effective device good for 400–500 uses
- Conveniently stows away like a pen with a pocket clip

Product code: VLENSPEN

Not for use on surfaces that contact the eye.

**Precision Optical Lens Cleaner**
Primary Application – Cleaning of Ophthalmic Lenses
- Absorbent, moistened lint-free towelette cleans lenses instantly, free from smudges, haze and water spots
- Ideal for use on Volk lenses, microscope eyepieces, cameras and other precision optical surfaces
- Packaged in boxes of 24. Bulk case purchase contains 108 boxes

Product code:
- Box: VPOLC1
- Case: VPOLCCASE

Not for use on surfaces that contact the eye.
Sterilization Tray
Primary Application – Sterilization of Ophthalmic Lenses
• Autoclave safe and approved for use with ETO
• Small tray (2.7” x 1.5” x 1.25”) houses Volk surgical and smaller indirect and slit lamp lenses
• Large tray (6” x 2.5” x 1.25”) houses the largest Volk lenses and accessories including vitrectomy handles

Product code:
Small Tray: VSCA
Large Tray: VSCB

Suture Ring
Primary Application – Provides a Stable Lens Platform During Vitreoretinal Surgery
• Premium surgical implant grade titanium for optimal durability and ease of sterilization
• Larger radius provides enhanced functionality and safety during use
• Compatible with all Volk direct and indirect contact vitrectomy lenses (except SSV* styles)

Product code:
VSRS2

Infusion Handle
Primary Application – Infusion of Saline Solution Beneath the Lens During Vitreoretinal Surgery
•Flushes blood and debris providing a clear view during surgery
• Autoclave sterilizable for reduced processing time
• Ideal for diabetic surgery

Product code:
VINFHAN

VitreoLens Handle
Primary Application – Holding and Stabilization of Lenses During Vitreoretinal Surgery
• Holds vitrectomy lenses stably to assist vitreoretinal surgery
• Malleability allows user to bend the handle to suit their preference
• Autoclave sterilizable for reduced processing time

Product code:
Mini Quad and Central Retinal: VVITHAN-LG
HRX, Mini Quad XL and Super Macula: VVITHAN-MQXL

Steady Mount
Primary Application – Precisely Holds and Positions Volk Lenses at the Slit Lamp
• Holds lenses steady at the slit lamp to facilitate photography and routine examinations
• Lens can be positioned, tilted and angled in all planes providing versatility
• Adapts to all slit lamps and holds all Volk lenses ensuring ease of use

Product code:
VSM

Research Lenses & Accessories
40
Volk’s new single-lens case features a sleek and modern functional design. We’ve incorporated a robust hinge designed to withstand over 50,000 openings and a magnetic closure that keeps your lens securely stored within the case.

**Engraving**

Add a personal touch to your lenses and single-lens cases by engraving custom text on them to create a personal possession that will last a lifetime.

**Want to keep your lenses together?**

Keep all our lenses in one convenient location with our multi-lens cases. Our multi-lens cases are available in two sizes: 3”x4” for up to 3 lenses or 4”x6” for up to 6 lenses. Almost any combination can be accommodated. Even if a standard case cannot meet your need, we can provide a customized solution for you.
Design Options

Patented Double Aspheric Lens Design

All Volk lenses are optically engineered using proprietary computer ray tracing and design criteria. The laser contact lens ray tracing at left shows light rays originating at the illuminated fundus and proceeding through the pupil and cornea to the first contact element. The diverging light bundles are converged and redirected towards the double aspheric imaging lens which further refracts and focuses the rays as a conjugate fundus image in the aerial image plane. From the beginning on the drawing board to final production and sale, each Volk lens is designed and produced to the quality standards that your practice demands.

Contact Options (Gonio Lenses)

Flanged versions of the G-Series provide optimal stability on the cornea and are suggested for laser treatment use.

No flange (NF) G-Series lenses have a small corneal contact area and are excellent for diagnostic work. It may not be necessary to use a contact fluid with these versions (gonio lenses only).

Our exclusive ANF+ flanged 3-Mirror version is designed for diagnostic viewing without the need for a contact fluid. It is beneficial to utilize a lubricating fluid for patient comfort.

The 3-Mirror No flange style requires a coupling fluid.

Contact Options (Contact Laser Lenses)

Flanged versions provide optimal stability on the cornea.

No flange (NF) versions have a smaller corneal contact area than flanged versions. It is still necessary to use a contact fluid with these versions.

Our exclusive ANF+ flanged version is designed to provide optimal stability without the need for a contact fluid. During diagnosis, it may be beneficial to utilize a lubricating fluid for patient comfort.

Volk Laser/Anti-Reflective Coatings and Filters

Most Volk lenses come standard with high efficiency laser/anti-reflective (A/R) coatings to optimize laser throughput and to assist in diagnosis by reducing glare in the visible spectrum.

Please contact Volk for additional information on laser coatings.
Warranty Information

Warranty Service
If the product fails to function due to defects in either materials or workmanship, Volk will, at its option, either repair or replace the product without charge, subject to the Warranty Limitations.

Non-Contact Slit Lamp & BIO Lenses
Volk Optical warrants its Non-contact Slit Lamp & BIO Lenses against defects in materials or workmanship for a period of 10 years from receipt by end user.

Laser & Diagnostic Lenses
Volk Optical warrants its Volk Contact Laser & Diagnostic Lenses against defects in materials or workmanship for a period of 5 years from receipt by end user.

G-Series Gonio Lenses
Volk Optical warrants its All GLASS G-Series Gonio Lenses against defects in materials or workmanship for a period of 4 years from receipt by end user.

Standard 3 & 4 Mirror Lenses
Volk Optical warrants its standard 3 & 4 Mirror Lenses against defects in materials or workmanship for a period of 1 year from receipt by end user.

2 mm Research Lenses
Volk Optical warrants its 2 mm research lenses (fundus and gonio) against defects in materials or workmanship for a period of 1 year from receipt by end user.

Pictor, Pictor Plus, & Volk Eye Check
Volk Optical warrants its Pictor, Pictor Plus, and Volk Eye Check ophthalmic imaging devices against defects in materials or workmanship for a period of 1 year from receipt by end user.

MERLIN® & ROLS® Reinverter
Volk Optical warrants its MERLIN® and ROLS® Reinverter against defects in materials or workmanship for a period of 1 year from receipt by end user.

Surgical Vitrectomy Lenses
Volk Optical warrants its Surgical Vitrectomy Lenses against defects in materials or workmanship for a period of 1 year from receipt by end user.

Autoclave Sterilizable Vitrectomy & Surgical Gonio Lenses
Volk Optical warrants its Autoclave Sterilizable (ACS) Vitrectomy and Surgical Gonio Lenses against defects in materials or workmanship for the lesser of 6 months from receipt by end user or 100 sterilization cycles.

Volk Power, Contact, Yellow Filter, Retinal Scale and Lid Lens Adapters; VitreoLens Handle®, Infusion Handle & Steady Mount
Volk Optical warrants its Volk Power, Contact, Yellow Filter, Retinal Scale and Lid Lens Adapters; VitreoLens Handle®, Infusion Handle & Steady Mount against defects in materials or workmanship for a period of 6 years from receipt by end user.

Volk® 1 Single-Use Lenses
Volk Optical warrants its Volk® 1 Single-Use Lenses against defects in material and workmanship for the period ending with the product’s sterility expiration.

Product Returns
All product returns must be disinfected and/or sterilized prior to return and be accompanied by a Return Authorization Number.

Please contact Volk Optical for a Return Authorization Number. Customers are responsible for returning products to Volk Optical, 7893 Enterprise Drive; Mentor, OH 44060; U.S.A. We recommend that all returns be insured and be sent by a traceable shipment method. Volk cannot be held responsible for lost shipments.

Warranty Limitations
Warranty service may not be provided without proof the product was purchased from Volk Optical Inc. or an authorized Volk Distributor.

This warranty becomes null and void if the customer fails to return the product in packaging consistent with the original protective packaging and it results in shipping damage.

This warranty becomes null and void if the customer fails to follow the recommended cleaning, disinfection and sterilization instructions and/or cautions contained in the product instruction manual.

This warranty does not cover service required because of disassembly, unauthorized modifications or service, misuse and abuse.

Warranty repairs will include labor, adjustments and replacements parts. Replacement parts may be remanufactured or contain remanufactured materials.

Limit of Liability
Seller makes no other warranty, express or implied, of the product supplied hereunder, including, without limitation, implied warranties of merchantability and fitness for a particular purpose, and all such warranties are hereby expressly excluded. Seller shall have no liability for loss of profits, or special, incidental, or consequential damages under any circumstances or legal theory, whether based on negligence, breach of warranty, strict liability, tort, contract, or otherwise. Seller shall in no event be liable in respect of this order and/or product delivered on account of this order for any amount greater than that paid to seller on account of this order. The purchaser acknowledges that it is purchasing the goods solely on the basis of the commitments of the seller expressly set forth herein.
