

Hy-gain GRK-6160 Instruction Manual

The Hy-gain GRK-6160 is an all-band radials system designed for the AV-6160 and other vertical antennas when a ground radial system is required. Ground radials provide a low-loss return path for antenna ground current. Longer radials and more radials help reduce ground losses and increase antenna efficiency

GRK-6160 consists of 2 sets of 4 radials wire assemblies. Total of 8 14-ft wires. To install, unwind the radial wires and straighten. Attach one set of radial wires to each side of the grounded base plate. Spread out the wire as shown in the figure below. The end of each radial wire has a solder lug attached. Use it to stake the wire end to the ground with long nails or wire bent in an "L" shape. The radial wires, themselves, may also be staked to the ground to permit the grass to grow over them.
