

POOL LINER INSTALLATIONS

VINYL LINER BENEFITS

- Cost effective
- Will not crack, chip, peel or flake
- Incredibly flexible - ideal for areas subject to ground movement
- Custom made to measure, for a perfect fit
- A wide range of colours and patterns to choose from

VINYL POOL LINER INSTALLATIONS

A pool liner installation is when we take an existing concrete, fibreglass or liner pool, and give it a makeover by installing a new pre- or custom made liner into the old shell or structure.

This can be achieved using one of two techniques; for concrete and fibreglass pools, or for existing liner pools where the surrounding areas such as pavers or decks cannot be removed, we can use a clipping system that sits under the coping of the pool and firmly secures the liner in place without having to uplift pavers or decking.

For existing liner pools where the surrounding areas can be removed, we can re-liner the pool using the conventional replacement liner method and no clipping system.

PARAMOUNT VINYL LINER REPLACEMENTS

To re-liner an existing paramount pool, we are able to use pre-made liners in set sizes. This gives us the benefit of being more cost effective than needing a custom-made liner. These liners are only available for the Paramount Lido and Big 6 Oval and Round pools in the following sizes:

Oval

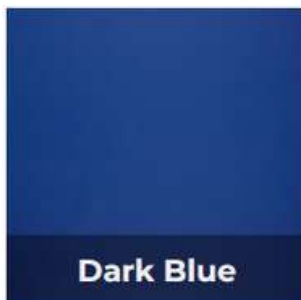

- 16 x 12
- 20 x 12
- 24 x 12
- 23 x 15
- 27 x 15
- 30 x 15
- 38 x 15

Round

- 1548
- 1748
- 2048

PARAMOUNT VINYL LINER COLOURS

Paramount liners are available in 3 colours - Light Blue, Dark Blue and Maui Patterned

CLIPPING SYSTEMS

There are at least 5 different types of clipping systems to cater for all situations. Below are the 3 most commonly used systems.

Waterline

This incredible Waterline flexible PVC extrusion seals the whole liner completely underwater. This allows you to use a ceramic tile band (coping) around the top of the pool, on bench seats and step areas then a low maintenance vinyl finish covers the rest of the pool.

T-Lock Retainer (2 part Above the Water Fixing System)

The T-Lock extrusion is a smaller profile and designed for fixing vinyl liners above the water. Unlike the Waterline extrusion, T-Lock is designed to lock a beaded liner in place while providing a clean, neat looking edge to where the liner is fastened.

Retainer and Capping

Other fixing systems include the Retainer which is a flexible hook type acceptor that fastens to the inside wall of the pool.

The Retainer can be used with welded bead or with Capping for overlap type liners. The wall height of the liner can then be adjusted during installation. This system is ideal for above water fixing where the pool may have overhanging bullnose brickwork or paving stones coping. Retainers and capping are made from flexible PVC which can easily fit tight radius corners.

AQUALUX CUSTOM MADE LINERS

A great swimming pool is beautiful, water-tight, durable, smooth-to-touch, and low maintenance. Aqualux is all this and more - making it the ultimate pool surface finish for any inground pool. Specially formulated for the harsh Australasian climate, Aqualux is also treated to resist bacteria, making it incredibly easy to keep clean. Whether you are replacing an existing inground pool liner, or renovating a painted, pebbled, tiled or even fibreglass inground pool, there are many reasons to line it with Aqualux instead of the existing surface finish.

AQUALUX VINYL LINER COLOURS

We offer custom-made Aqualux vinyl liners in 11 different colours, each with their own unique qualities. See below for our current colour offerings.

INSTALLATION

Our renovations team have over 30 years combined experience in liner installations. We understand that renovations may seem daunting, therefore our dedicated team will navigate every step of the renovation process alongside you, ensuring it is smooth, stress free and as enjoyable as possible.

We're also really proud that our talented team recently completed the biggest liner installation of it's type in New Zealand - the custom-made Aqualux liner for a local school pool weighed in at a hefty 450 kg and had to be forklifted into the pool!

This renovation was also awarded Gold at the Swimming Pool and Spa Association Awards in June 2023 in the Commercial Vinyl lined pool category.

NEXT STEPS

The next step from here is to have a chat with one of our renovations technicians to answer any questions you may have and to allow us to get a real sense of what it is you're trying to achieve.

If we're the right fit to help you achieve your goals, we will arrange a site visit to assess your current pool, and to get some more specific information in order to provide you with a written quote.
