

hardcover spa covers

style and function

NZ made spa hardcovers

BMH spa hardcovers have a high thermal resistance and virtually eliminate evaporation. We supply new spa pool covers in a variety of colours and sizes. If you know the model of spa pool you own, then we can supply a new spa cover using our extensive list of patterns. If you don't then we can custom manufacture to your spa's dimensions, ensuring the right size and shape is supplied. At BMH, all our hardcovers are New Zealand made and after 25 years of manufacturing, we can safely say they are constructed to survive New Zealand conditions.

Benefits of a spa hardcover

- Provides superior insulation
- Reduces heating costs
- Virtually eliminates evaporation
- Easy to use
- Made to NZ8500:2006 Standards

Application & construction

- Can be used on both residential and commercial spas.
- Spa hardcovers are made by inserting two high strength polystyrene foam sheets into a vinyl outer.
- The bottom of the spa cover is made of chlorine resistant P.E. plastic to eliminate bleaching.
- The handles are internally strengthened.
- The tie downs are strengthened and adjustable.
- Locking mechanisms are fitted to limit access to the spa.
- We use proven U.V. resistant vinyl (proven over 17 years of use).
- The central hinge is strengthened.
- The internal foams are supported across the centre with an aluminium channel.
- The internal foams have a 100 to 50mm taper to encourage rainwater to run off

Spa hardcover unique features

- BMH covers are NZ Made
- Durable construction
- Tiedowns fully adjustable and lockable
- Tapered fit that allows water run-off
- Available in 12 colours
