

# MEGA<sup>LITE</sup>

## Spotbot LED CYM 300

### DESCRIPTION:

MEGA-LITE presents the Spotbot LED CYM 300, a versatile LED fixture that is affordable, full-featured and all-purpose. Equipped with a high-powered 300W LED engine that can produce a bright, powerful and even projection, the Spotbot's impressive 7° - 31° zoom range allows for the unit to be utilized in versatile settings. When combined with the 8 facet rotating prism, the gobos appear to come alive. The 10 fixed and 7 rotating gobos allow you to morph between them using the focus and zoom. The smooth CYM color mixing can create many color combinations. It also offers a unique set of added colors that reside on the back end of the CYM color flags. In addition to the ability to generate a multitude of color sequences, the Spotbot also features a frost filter for a colorful, smooth soft-edged wash. The Spotbot LED CYM 300 is the perfect multi-tool, robust, full size fixture to have in your lighting tool chest.
