

A NEW FLAGSHIP TUBE MICROPHONE

Delivers the pristine, musical sonic character and uncompromising performance of the world's most prized recording equipment.

The RNT is the third microphone in the collaboration between sE Electronics and Rupert Neve Designs®, founded by the legendary audio designer Mr. Rupert Neve. Much like the RNR1 Active Ribbon and RN17 Small-Diaphragm Condenser, the RNT is something truly special, developed over years of careful listening and measurement by Mr. Rupert Neve, Mr. Siwei Zou, and the engineering teams from both Rupert Neve Designs and sE Electronics.

CUSTOM CIRCUITRY THROUGHOUT

Hand-selected ECC82 tube and custom Rupert Neve Designs audio transformer

- Each microphone-grade tube is carefully selected and pretested in-house
- Allows for stunning realism and depth in recordings
- Unique tube circuit design optimized for driving the first custom-made transformer

Custom-made, discrete Class-A amplification from RND

- Delivers the sonic character and performance expected from the world's most prized recording equipment
- Utilizes the same operational amplifiers found in Rupert Neve Designs' flagship 5088 console
- These discrete op-amps ensure enormous headroom, ultra-wide bandwidth, zero crossover distortion, and quality without compromise

In the floor box: a second custom-built RND audio transformer

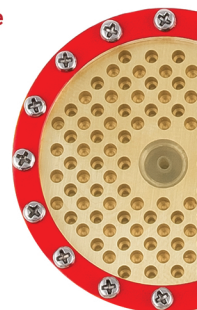

- Designed for sweet, musical performance and bulletproof isolation
- Provides the legendary sonic character of Rupert Neve's famous transformers

Hand-crafted, gold-sputtered 1" true condenser capsule

- The finest & most complex capsule sE has ever built
- Hand-crafted and individually tuned in sE's own factory
- Refined electrode design delivers supremely natural sound quality

Nine selectable polar patterns

- Precisely-tuned dual-diaphragm capsule design allows you to choose the perfect setting for every application
- Minimize unwanted signal bleed with ease

UNRIVALED SONIC HERITAGE

All in all, this new flagship tube microphone brings the larger-than-life sounds of classic studio microphones into the modern age with greater depth & clarity than ever before.

"Siwei has done an amazing job on the microphone. Very high performance, & I believe a very nice sounding result."

- Mr. Rupert Neve
