CLASSIC VERSATILITY AT ITS FINEST

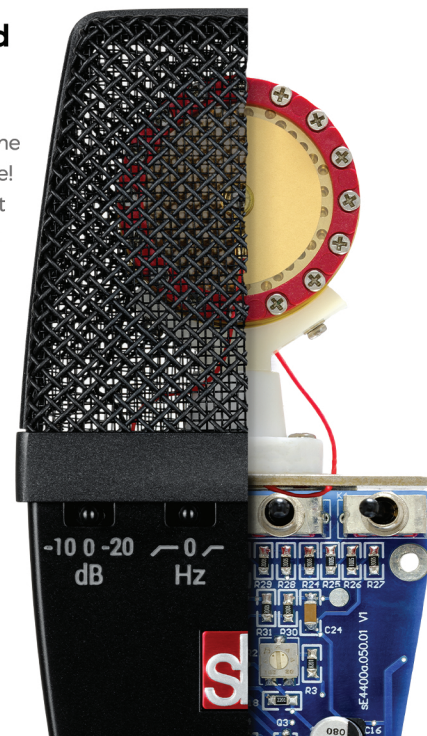

sE4400

Pushing the boundaries of versatility - beyond the expectations of an all-rounder

Classic sound meets modern craftsmanship; we are proud to re-introduce the improved **sE4400, multi-pattern large-diaphragm true-condenser** microphone! Hand-crafted with the highest attention to detail, built with a roadworthy die-cast all-metal housing, metal switches, and rugged spring steel wire mesh grille that can take a beating during day-to-day tour life.

The sE4400 appeals with its down-to-earth elegance, offering discrete electronics prioritizing the features you really need. The sE4400 brings sought-after classic sound back to mic lockers worldwide with all-metal switches that let you select between **4 polar patterns; from cardioid to omnidirectional or figure-eight to hypercardioid.**

Whereas the switchable attenuation pads and low-cut filters compensate for loud vocals, guitars, drums, and brass instruments - and easily tame excessive low-frequency rumble or proximity effect. The sE4400 comes with a hand-crafted, gold-sputtered, dual-diaphragm capsule to capture sound sources of all kinds with breathtaking clarity and precision, be it in demanding studio or fast-paced live environments.

FREE OF THRILLS. JUST GREAT SOUND.

Available as a matched stereo-pair

Each **sE4400 Matched Pair** is rigorously tested, tuned in-house and sonically matched to ensure a virtually identical frequency response for balanced, consistent sound. Complete with a metal mic case, stereo bar, two shockmounts and two sE4400 microphones. While each **sE4400** comes complete with a metal mic case, shockmount, thread adapter and user manual.

HAND-CRAFTED TRUE CONDENSER CAPSULE
