

# V SERIES

V7 V7 CHROME V7 BLACK V7 MC1 & MC2 WIRELESS VOCALS V7 X V3 ALL-PURPOSE

## LUSH, VIBRANT SOUND FOR ANY SOURCE

also available:

Brilliantly natural sound for vocals and all of your instruments - whether on stage or in the studio.

The **innovative, specialized aluminum voice coils** in the V7 dynamics have been **custom-developed for a crisp, open sound** that perfectly captures your voice and instruments in the most natural way you've ever heard on stage, and provides **vast amounts of gain before feedback**.

They can take a beating too - the **all-metal construction** and **beveled spring steel grilles** make these dynamics rugged, reliable companions for the road, and the **internal windscreens & patented integrated shock mounts** keep the capsules safe from plosives and wind while providing **exceptionally low rumble & handling noise**.

While the supercardioid capsule in our **V7** is designed specifically to capture the human voice, the **V7 X** capsule and custom acoustic design are tailored for instrumental reinforcement & recording with a perfect balance of detailed highs and deep, clear lows, allowing for use on nearly any source from electric guitar cabinets to brass instruments, snare drums to choir, and many more.

### V7 CHROME

### V7 MC1 for Shure® wireless

### V7 MC2 for Sennheiser® wireless

## BUILT TO PERFORM, BUILT TO LAST

A rugged, all-purpose dynamic fit for any source.

The **V3** shares the same **all-metal construction, spring-steel grille, integrated windscreen & patented shockmount** as its big brothers. With a **cardioid capsule** (rather than the V7's supercardioid), it is equally at home on vocals and acoustic or amplified instruments.

The V7 & V3 handhelds each come complete with a storage pouch, mic clip, stand thread adapter, and a spare black windscreen (just in case red isn't your thing).

*"...an awesome thing! It rejected better, it sounded more like Justin's voice and it makes our job a lot easier. We just really love the capsule, it's great!"*

- Andy Meyer, FOH (Justin Timberlake)

*"It's a breath of fresh air...great rejection, a very smooth high-mid response, a nice airy top...I am a huge fan of the V7!"*

- Drew Thornton, FOH / Mix Engineer (Billie Eilish)

**Robust build. Exceptional sound. The V Series Dynamics.**
