

# V BEAT + V CLAMP

## EFFORTLESS SOUND, SUPERIOR ISOLATION

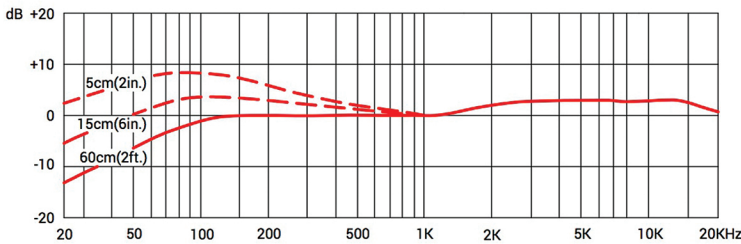

Effortlessly amazing sound for any snare or tom drum, whether on-stage or off.

The **V BEAT** is the most compact drum microphone in its class, intended for use with snare or tom drums. Unlike the V7, which is optimized for vocals, the V BEAT features the same high-grade sonic performance as the V7 X instrument dynamic, but in a dedicated low-profile & drum-friendly form factor. Tuned for instrumental use, it can also be used on sources such as electric guitar speaker cabinets or brass instruments.

Its **custom DMC7 X dynamic capsule** offers the same innovative aluminum voice coil technology and features as the V7 X instrument mic - and its **supercardioid pattern** helps isolate your snare or toms from other drums and cymbals.

The **advanced internal capsule suspension** also efficiently decouples the capsule from mechanical vibration, isolating it from shocks & jolts and eliminating the need for an external shock mount.

*"It's got to be the most natural, rounded sound on a tom I've ever heard, and it's the sound I've been searching for for 20 years...and I'm happy to say I've finally found it."*

- Christian Cowlin (FOH, The Wallers)

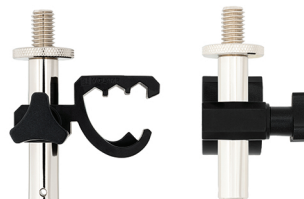

## MINIMAL FOOTPRINT, MAXIMUM FLEXIBILITY

The V BEAT utilizes an extremely low-profile mechanical design, with the **XLR connector and stand mount integrated in parallel** on the underside of the flexible swivel mount. This minimizes the V BEAT's footprint, **removes any cables from line-of-sight**, and negates the need for any right-angle adapters or special cables. It also means there's **no danger of cables interfering with the drummer's performance**, as they are kept out of the way of cymbals and drum sticks alike.

When used as intended with the V CLAMP, the V BEAT becomes even more compact and flexible.

The **V CLAMP** adds another axis of vertical movement for even better **fine-positioning ability**, and keeps the V BEAT securely fastened to your drum rim while adding barely any bulk to the overall footprint.

**Robust build. Exceptional sound. The V Series for Drums.**
