FFP2/KN95 Particulate Respirator

Personal protective devices that protect the wearer from against dust, droplets, and other airborne particles contaminating the face. They are designed to achieve a very close facial fit to form a seal around the nose and mouth and maximize the filtration of particles.

Features

-  Certified to block 95% of small airborne particles
-  4-Layer design
-  Advance materials for comfort and easy breathing
-  Blocks particulates as small as 0.3 micron
-  Fitted design with sturdy elastic ear loops
-  Aluminum nose-bridge molds to your face

Respiratory Protection against non-oil particles:

- ✓ Dust
- ✓ Droplets
- ✓ Microorganisms
- ✓ Pollen
- ✓ Mold
- ✓ Air Pollution (SMOG)
- ✓ Wildfire Smoke
- ✓ And other solid particles suspended in the air

Note: proper fitting required for protection
