Weight Management

Cell Activator is a special formula which supplies the body with B-vitamins (B1, B2 and B6), plus the essential minerals, manganese and copper for normal energy metabolism and zinc for normal carbohydrate metabolism.

KEY BENEFITS

- Rich in B vitamins to help unlock the energy in foods.
- Contains zinc for normal energy metabolism.
- Daily support for cells energy production and protection from oxidative stress.

HOW CAN IT HELP YOU?

The minerals zinc, copper and manganese help protect the cells from oxidative stress, therefore, taking a food supplement such as Cell Activator may offer support for hectic lifestyles.

USAGE

Take one capsule three times per day.

ALSO TRY

A low calorie caffeinated effervescent energy drink, with added vitamins B and C, Liftoff can help increase alertness and improve concentration.
