

## Nissan Normal dashboard can filter

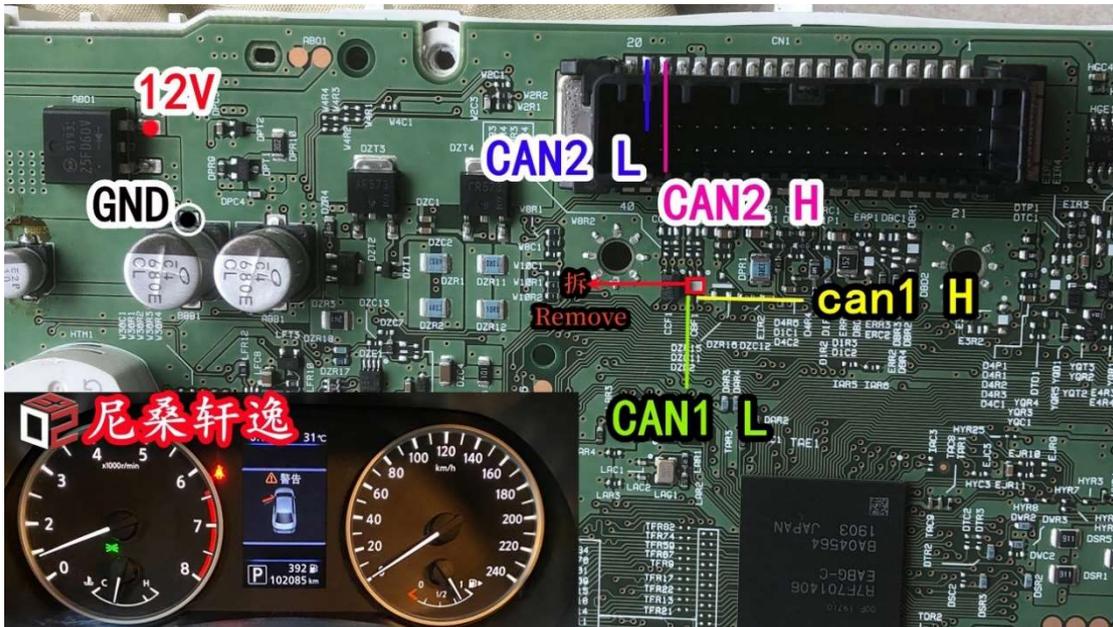

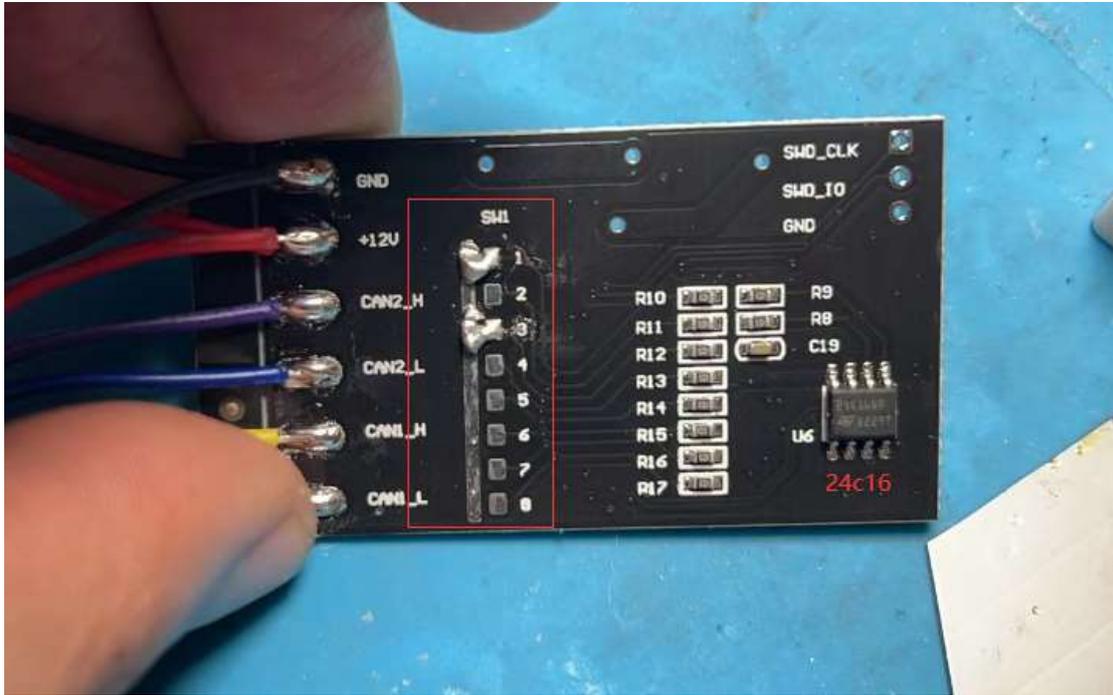

**1: Remember the origin mileage of the car, remove the dashboard.**

**2: Read the 25640 data and send to us, tell us the exact origin mileage value displayed on the dashboard and new kilometers you want it to adjust.**

**3: We will send you 24C16 data and write to 24C16 Chip on filter; and write new 25640 data to the dashboard (25640), and short-circuit the can filter**

switch (mentioned in the file name) accordingly.

**4: Solder the filter according to the wiring diagram provided, Install dash on to car after soldering is completed.**

**5: When the dashboard is installed on the car, the dashboard shows 0KM, and after driving 1KM on the road, it will be the mileage you want.**
