

HONEY

UV-C LED Sanitizer + Smart LED Lighting

USER MANUAL

LIM-HV-001

Please read these instructions carefully before use and keep them handy for future reference.

PRODUCT SPECIFICATIONS

Model No.	LIM-HV-001
White LED Power	3W (6 x 0.5W)
UV-C LED Power	1.5W
UV-C Radiant Flux	20mW
Luminous Flux	>120 ± 10LM
CCT	3000K (Warm White)
CRI	>80
Net Weight	72g
Power Supply	Micro-USB
Size	93 x 80 x 20mm (L*W*H)
Charging Voltage and Current	DC 5V 2A

* Specifications are subject to change without prior notice.

Measurement Tolerances

Voltage measurement allowance is ±0.2V
Radiant flux measurement allowance is ±10%

PRODUCT FEATURES

OPERATING INSTRUCTIONS

UV-C Auto Mode

- * The warm white LED lights will automatically be turned on when the sensor detects motions.
- * The warm white LED lights will be switched off automatically 15 seconds after the last motion is detected.
- * After the warm white LED lights have been turned off, the UV-C LED lights will automatically be turned on for 2 minutes for disinfection.
- * Subsequently, the UV-C LED lights will be turned off automatically to conserve battery life until motions are detected again.
- * Effective sanitizing distance: 1 to 50cm.
- * Certified by SGS, Intertek and CMA Laboratories.

INSTALLATION GUIDE

Easy to Stick & Remove

This device contains a magnet which can be attached to any iron surface.

For Non-Magnetic Surfaces

1. The device comes with a steel plate with the adhesive tape.
2. Apply the steel plate to your desired location. Make sure the surface is clean and dry before applying.
3. Remove the plastic film from the adhesive tape and stick the steel plate onto your desired location.

4. Apply pressure to the steel plate for a few seconds to station the steel plate on the surface.
 5. Align the magnet on the back of the device to the steel plate and the two parts will attach magnetically.
- * Sanitizing effect will be affected by the installation method and the distance between the device and the object.

To Charge

1. The indicator will flash when battery is low.
 2. Connect the Micro-USB to the charging port. Please make sure the orientation is correct.
 3. Connect the other side of Micro-USB cable to a power source or other USB connection sockets. The red-light indicator will turn on when charging, and the green-light indicator will turn on when fully charged.
 4. Please unplug the Micro-USB cable when the device is fully charged.
 - Time takes to fully-charge the device: Approximately 2 hours.
 - Total operating time when the device is fully-charged: Approximately 2 weeks.
- * Calculation based on usage of: 2 times a day, 3 minutes each time.

SAFETY INSTRUCTIONS

⚠ Caution

- * Please keep a distance of at least 30cm between yourself and the UV-C lights when using this device.
- * Do not expose yourself directly under the UV-C lights, otherwise, severe and irreparable damage may be caused to your skin, body and organs.
- * This device should be stored away from children. Never allow this device to be used as a toy for children.
