VAC-XL-S

Standard Vacuum Pump Lubricant

VAC-XL-S is recommended for use in use in vacuum pumps. It utilizes an advanced-technology blend to provide a fluid that is chemically and thermally stable. VAC-XL-S offers low vapor pressure, excellent rust and corrosion protection, and very good resistance to oxidation and sludge formation.

ATTRIBUTES:

- Low vapor pressure
- Good thermal, oxidative, and chemical stability
- Protects against wear, rust, and corrosion
- Controls carbon and varnish formation
- Low volatility
- Excellent film strength
- High flash point 399°F
- Non-toxic and Non-hazardous

LUBRICANT PROPERTIES:

▪ VAC-XL-S Grade	22
▪ Viscosity cSt @ 104°F	21
▪ Viscosity cSt @ 212°F	4.2
▪ Flash Point °F	399
▪ Copper Corrosion, 24 hr	1a
▪ Demulsibility, 130°F, 30min	40/40/0
▪ Rust Test	Pass
