## VANE-XL-S

### Standard Rotary Vane Air Compressor Lubricant

VANE-XL-S is recommended for use in rotary vane air compressors and vacuum pumps. It utilizes an advanced-technology blend to provide a fluid that is both chemically and thermally stable. VANE-XL-S offers low vapor pressure, excellent rust and corrosion protection, and very good resistance to oxidation and sludge formation.

#### **ATTRIBUTES:**

- Low vapor pressure
- Thermal and chemical stability
- Good oxidative stability
- Carbon, varnish, wear, rust, and corrosion control
- Low volatility
- High flash point 503°F
- Non-toxic and Non-hazardous

#### **LUBRICANT PROPERTIES:**

▪ VANE-XL-S Grade	100
▪ Viscosity cSt @ 104°F	98
▪ Viscosity cSt @ 212°F	11.6
▪ Flash Point °F/°C	503/261
▪ Copper Corrosion, 24 hr	1a
▪ Demulsibility, 130°F, 30min	40/40/0
▪ Rust Test	Pass
