

JANA LAM FITTED MASK FILTER PATTERN

1. Print and cut out the filter pattern.
2. Trace onto your filter material of choice and cut out. Some options are a vacuum bag or other household HEPA filter, coffee filter, or even a face tissue or tissue paper. The filtration ability/breathability will vary with your material.
3. To use, insert filter inside your clean mask, edge to edge.
4. After use, toss the filter and wash your fabric mask in hot water. Do not reuse filters!
