

STRAND S752U Software update procedure

For iPhone:

After connect Glory Fit APP successfully,

1. Go to Glory Fit APP > Device > Fireware update;
2. New firmware tips pop up, asking do you want to update > click “yes”
3. Then wait for the update, which will take a few minutes, until the update 100% complete;
4. When the update is complete, the watch will automatically restart, after which it can be used normally

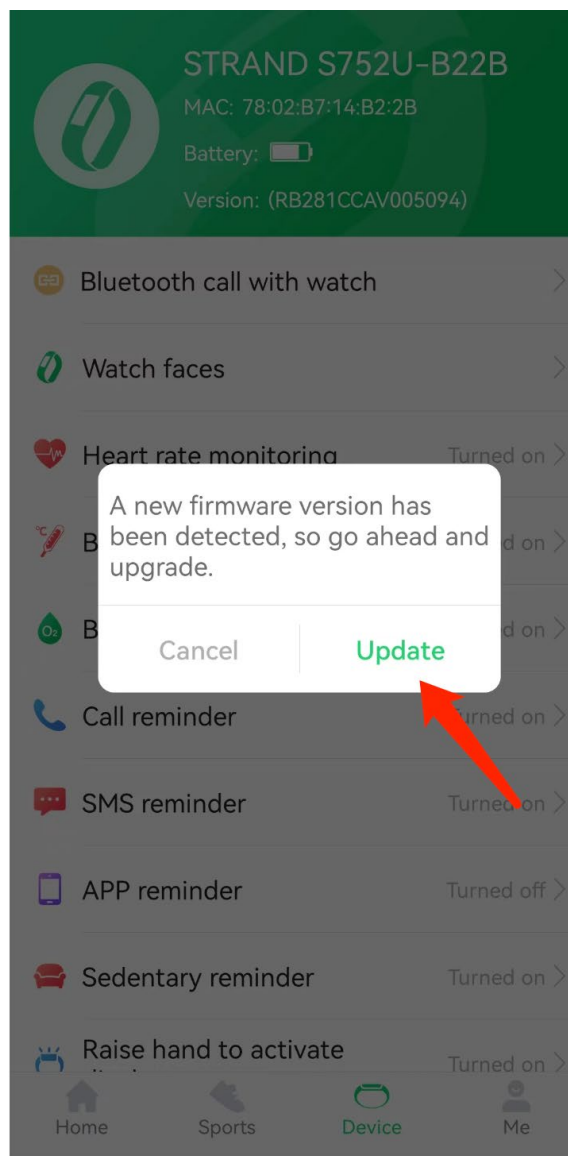

For Android phone:

After connect Glory Fit APP successfully,

1. Go to Glory Fit APP > Device > Firmware update;
(It is also possible that after the app successfully connects to the device, the prompt whether to update the firmware will pop up directly - like below picture)
2. New firmware tips pop up > click "update"
3. Then wait for the update, which will take a few minutes, until the update 100% complete;
4. When the update is complete, the watch will automatically restart, after which it can be used normally

Find new version, update or not?
