

# Cocktail Production Assistant.

UPDATED FEBRUARY 2024

## Who are we & what do we do?

Here at Black Lines we are looking for an individual who is interested in joining a fast-growing, disruptive business in the drinks industry. We are currently a team of 17, producing premium cocktails on tap and in bottle. We sell to a number of top venues and retailers across the UK, including The Standard Hotel, Boxpark, Shop Cuvée, Clapton Craft, North Brew Co and many more. As such, the individual must be interested in working in a small, focused team and will enjoy exposure to all facets of the business.

## The Role:

The role we are looking to fill is Cocktail Production Assistant, who will join the production team to manufacture premium batched cocktails and help to streamline the production process.

Key requirements for the role are an interest in cocktails and drink production processes, stock management capabilities and an understanding and good practice of hygiene and health & safety.

Prior experience of working in a brewery or other production facility is necessary.

## Key Information:

- £25.5K-£32K Base Salary
- Location: Tottenham - N17 ORE.
- Working Hours: 08:00-17:00, Monday to Friday.
- Expected start date: ASAP.
- Introductory training provided on HACCP L2 and Food Hygiene & Safety Level 2.

## Benefits:

- 33 days holiday annually.
- Annual Company performance-based bonus.
- Company events.
- Employee discount.
- Free parking.
- Health & wellbeing programme
- Commitment to continual training and development in all areas.

## Requirements:

- Demonstrable experience in brewing / drinks production in a manufacturing environment.
- Interest in the drinks industry, specifically spirits and cocktails.
- Keen eye for detail, organisation, and following process.
- Understanding and good practice of hygiene and health & safety, and compliance with high standards.
- Desire to be a part of a small, growing business in the drinks industry.
- Ability to cope well with variety.
- Self-starter, hungry to grow.

## Role Responsibilities:

- Mixing products to recipe and meeting expected testing levels (pH, brix and carbonation levels)
- Bottling, kegging, capping, labelling and packaging consistently
- Stock movement, including regular heavy lifting and movement of multiple 20kg kegs.
- Stock control and counting of products, ingredients and packaging.
- Equipment Maintenance – cleaning and regular checks
- Working efficiently to meet production schedule deadlines
- Safety & compliance – adhering to health & safety and food safety regulations.
- Product quality responsibility – following checklists and procedures
- Continual learning and collaboration
- Being involved with new product development.
