ABOUT US

Astor and Banks was started simply because I wanted to do something I absolutely loved. A watch guy since my dad first showed me his Timex Indiglo and since I first purchased my own watch while stationed in Germany during my military service. We offer precise timepieces using mechanical and Swiss quartz movements. All watches are assembled here in Chicago by us.

We use materials of durability, reliability, and add great design with the goal to make a fine timepiece that you will enjoy for a lifetime. Follow us to stay connected and thank you for visiting us.

All the best,
Andrew Pérez

INSTRUCTIONS FOR USE

INSTRUCTIONS

Winding the watch (crown position 1)

The crown is screwable (crown position 0). To loosen the crown, turn it counter-clockwise (crown position 1). The movement is wound by turning the crown clockwise. About 40 winds of the crown are generally enough to ensure reliable functionality. Under normal circumstances, simply wearing the watch every day should suffice to keep the self-winding mechanism wound. The power reserve allows you to take off your watch overnight without having to re-wind it.

Time adjustment (crown position 3)

In crown position 3, the motion is paused. This helps you to set the watch precisely. Please make sure the date changes at midnight and not at midday. Just move the hands forward until the date changes. Afterwards you attempt to set the time. We recommend moving the hands past the desired minute marker and then adjusting it backwards. The movement restarts as soon as the crown is no longer in position 3.

Quickset date adjustment (crown position 2)

Set the crown in position 2 and turn it clockwise until the correct date appears in the date display window.

Please take care to fasten the crown after making adjustments.

TECHNICAL DETAILS

SIZE: 42mm Diameter , 12.7mm High

CASE: Brushed 316L SS w/ Screw Down Diamond shape crown and solid case back and special seals

CRYSTAL: Sapphire Crystal w/ AR coating (underside)

DIAL: Navy Blue with a Sun Ray finish w/ C3 Superluminova markers or black with BGW9

MOVEMENT: Swiss Made Automatic Cal. 2824-2 adjusted

WR: 20ATM

STRAP: 22mm Handmade Genuine Horween Leather

LIMITED 5-YEAR WARRANTY

ASTOR+BANKS a limited 5 year warranty under the terms and conditions of our warranty. In case of defects covered by the warranty, all components excluding battery, leather strap and buckle will be repaired or the watch will be replaced at no cost. If the exact model is not available for replacement, a watch of equal value and similar style will be provided. A copy of the receipt and/or your completed warranty registration is required as proof of purchase. A check or money order payable to ASTOR+BANKS LLC in the amount of \$30.00 as a service and handling fee must be included for all warranty and repair services. The fee is subject to change.
