

RE: OPEN YOUR SOUL

with new re:soulutions

As we approach the season of goodwill and new year's resolutions, we think of Christmas and spending time with loved ones both friends and family, it's a time to cherish these bonds and create magical memories. Whether it's decorating the tree together or singing carols, these traditions help create a sense of continuity, nostalgia and togetherness. Considering what would bring joy and happiness to your loved ones is when the act of giving becomes more meaningful reflecting your understanding and appreciation for them.

Big scary resolutions are so last year. Focus on achievable small wins you can stick with, which help us feel better in the long term. Allow time to appreciate ourselves and reconnect, this can be as simple as setting aside a few minutes each day to engage in mindfulness exercises, such as deep breathing or meditation, to cultivate a sense of calm and presence. Focus on developing a positive outlook by practicing gratitude, reframing negative thoughts, and surrounding yourself with uplifting influences. Make it a resolution to experiment with different scents and fragrances to find ones that bring you joy, relaxation, or inspiration. This can be through candles, essential oils, or perfumes.
