

# Beam Renew and Tote Renew

Apply *Beam Renew*<sup>™</sup> and *Tote Renew*<sup>™</sup> to your warehouse racks, shelves, totes and containers and forget about ever having to scrape away old barcode labels again.

## No Scraping. No Residue. No Kidding.

Our new innovative **Beam Renew** and **Tote Renew** products are laminated label-holding strips that make it easy to apply, remove and relabel beams and containers when your product inventory and information changes, or when re-slotting or reconfiguring locations.

Operate more efficiently and eliminate countless unproductive worker hours otherwise spent scraping off old labeling and repeatedly cleaning racks, beams, totes and shelves. Apply it over your old labels and worn beams in a matching color for a clean, new look.

## Key Features:

- **Easy Label Removal** – Apply traditional barcode labels to this laminated base strip for easy removal whenever product information or inventory changes. Ideal for warehouse racks, beams, shelves, bins and totes. No adhesive residue – or labor-intensive clean-up.
- **Reusable** – Durable construction ideal for reusable totes, containers and bins. Extends useful life of totes and supports interchangeable use among your network of distribution centers.
- **Clean and Professional** – Keeps beams and shelves looking clean and new. No need to paint or resurface older rack beams.
- **Cost Effective** – Eliminates need for plastic sleeves and placards to house labels on shelves and totes.
- **Reduces Scan Errors** – Avoid potential scan errors from partially exposed, previously used labels.
- **Color Variety** – Match or contrast your environment.

*Our specialized laminated coating makes it easy to apply and remove labels from warehouse beams, totes and shelves without any scraping or adhesive residue.*
