Mobile Powered Workstation

Slim, Light and Adaptable Mobile Powered Workstation

NB Series SLIM

The NB Series SLIM Mobile Powered Workstation was developed to provide maximum maneuverability within a facility. With a compact 18" (457 mm) wide x 26" (660 mm) deep footprint, this ergonomically designed unit can be easily positioned in narrow aisles and into the most remote corners.

The NB Series SLIM offers maximum flexibility. Each shelf is secured to a slotted upright system and can be repositioned in seconds to suit the operator's needs.

- Narrow footprint allows access anywhere in warehouse or retail floor
- Facilitates mobility for full workstation
- Lighter weight than standard cart
- Rugged features for durability, designed for customer-facing environments
- Compatible with most current accessories

Simply remove when power is low and replace with charged battery

Designed with Advanced Power Swap Features:

The NEW NB Series SLIM Mobile Powered Workstation is designed to power your printers, computers, scales, and other hardware 24 HOURS PER DAY. This optional feature is ideal for facilities with multiple work shifts.

www.newcastlesys.com/powerswap

- When the NB Series SLIM battery power is running low, simply swap out its power system with a fully charged one.
- The swap takes about 30 seconds to complete, allowing the NB Series SLIM Mobile Workstation to be used during multiple shifts.
- Minimal interruption, maximum productivity
