

OP/TECH USA®

As an approved supplier to the world's largest distributors, OP/TECH USA realizes the importance of having the best designs for increasing employee safety and productivity while reducing equipment damage. We proudly manufacture a wide assortment of slings, straps, and harnesses for hand-held devices used in warehouse, distribution, and fulfillment centers.

Our focus is Protection, Productivity and Performance!

FORKSWIFT™ – Scanner Management System

The **FORKSWIFT™** is the ideal accessory for managing a scanner on a forklift. It attaches to the forklift's frame with a hook-and-loop fastener, and features a neoprene pad cushion to protect the scanner from impact.

The adjustable elastic retaining strap allows for complete freedom of movement of the operator, yet retracts to stay out of the way while driving. When not in use the Scanner Hook Adaptor allows the scanner to hang from the convenient hook. Your device is always ready at a moment's notice, yet hangs conveniently out of the way when not in use.

Since the **FORKSWIFT™** attaches with our exclusive **Mini QD Loop Connectors**, it is fully compatible with our complete line of wearable scanner harnesses, slings and wrist straps. Move your device from one configuration to another in just a few seconds!

Dropped or lost scanners are a thing of the past with the FORKSWIFT scanner strap. Most users see a dramatic increase in productivity as well, since the scanner is always readily available, and protected from loss. Protecting your expensive electronic devices is the name of the game with OP/TECH USA!

Scanner hangs out of the way yet is always at the ready.

Elastic strap assures full range of movement.
