

OP/TECH USA[®]

As an approved supplier to the world's largest distributors, OP/TECH USA realizes the importance of having the best designs for increasing employee safety and productivity. We proudly manufacture a wide assortment of slings, straps, and harnesses for hand-held devices for all companies using hand-held devices.

Our focus is

- Safety
- Security
- Ergonomics
- Productivity
- Efficiency
- Comfort

FOR SCANNERS & OTHER SMALL DEVICES (All feature breakaway connectors)

The **SCANNER SLING** attaches to hand-held scanners or tablets using MINI QD LOOP connectors. It's fully adjustable (28" - 66" circumference) and has a breakaway connector (8-10lbs) for employee safety. The scanner slides easily up and down the sling for ease of use. Scanner Sling improves employee productivity and safety while keeping the device free from damage or loss.

The **SCANNER COMFORT SLING** attaches to hand-held scanners or tablets using MINI QD LOOP connectors. It has a comfortable neoprene shoulder pad with a non-skid surface to keep it in place and is fully adjustable (44" -82" circumference). It has breakaway connectors (8-10lbs) for employee safety. The scanner slides easily up and down the sling for ease of use. Scanner Comfort Sling improves employee productivity and safety while keeping the device free from damage or loss.

The **SCANNER HARNESS** is ideal for hand-held scanners or tablets used in the warehouse. It's fully adjustable and extremely versatile. The scanner device freely glides up and down the harness when actively in use and rests comfortably at the side when it's not needed. The harness is comfortable for men and women while also being able to be configured for right or left-hand use. The breakaway connectors (8-10lbs) offer additional safety to employees in an emergency situation. It helps to improve employee efficiency while also keeping devices safe from damage or loss. It's available in four sizes (Small, Regular, Large, X-Large) to offer the perfect fit.

The **SCANNER HARNESS-ELASTIC VERSION** is perfect for hand-held devices and tablets. It's fully adjustable and extremely versatile. The elastic sling section of the harness enables the user to cinch the harness closer to the body while doing activities such as driving a forklift or other intricate tasks and stretches out to give a full range of motion. The scanner device freely glides up and down the harness when in use and rests comfortably at the side when it's not needed. The harness is comfortable for men and women while also being able to be configured for right or left-hand use. The breakaway connectors (8-10lbs) offer additional safety to employees in an emergency situation. It helps to improve employee efficiency while also keeping devices safe from damage or loss. It's available in two sizes (Regular, Large).

FOR TABLETS & LAPTOPS (All feature breakaway connectors)

The **DOUBLE HARNESS** is available in both webbing and elastic versions and is perfect for carrying one device centered in the front or for carrying two devices, one on each side. This is ideal when a scanner, printer or tablet are needed. The harness is fully adjustable and comfortable for both men and women. The breakaway connectors (8-10 lbs) protect employees in emergency situations. The **DOUBLE HARNESS** increases employee productivity and efficiency while keeping devices protected from damage or loss. It is available in two sizes (Regular, Large).

The **ELASTIC HARNESS** comfortably stretches to fit most body sizes and shapes while keeping the device close to the body. The device remains attached to the harness where it can freely glide up and down or perch against the body when in use. The breakaway quick disconnects (8-10 lbs) keep the employee safe in an emergency situation.

The **SCANNER ELASTIC WRIST STRAP** allows free use of the scanner without getting in the way. It attaches to the scanner with small loop connectors and includes two breakaway quick disconnects (breaks away at 8-10 lbs of force). It offers security and safety while using a scanner or other device on the warehouse floor. The device can be disconnected and quickly attached to any of our other harnesses, slings or straps.

The **SCANNER ADJUSTABLE ELASTIC WRIST STRAP** allows free use of the scanner without getting in the way. It attaches to the scanner with small loop connectors and includes two breakaway quick disconnects (breaks away at 8-10 lbs of force). It can be cinched tighter for smaller wrists and secured with a hook and-loop fastener. It attaches to the scanner with small loop connectors and includes two breakaway quick disconnects (8-10 lbs) for safety in an emergency situation. It offers security and safety while using a scanner or other device on the warehouse floor. The device can be disconnected and quickly attached to any of our other harnesses, slings or straps.

EXTRA CONNECTORS

5 pack or
10 pack

MINI QD LOOP CONNECTORS come in a pack of 5 or a pack of 10. These connectors are used on all of the OP/TECH USA warehouse scanner straps, slings and harnesses. By attaching these connectors to all of your scanning devices, users can quickly and easily switch between devices or OP/TECH USA strap options.

The **CONTACT ANCHOR LOOP** allows you to use any of our wearable solutions with a device that may not have a strap connection point. With its industrial-strength self-adhesive backing you can choose any smooth surface of your portable electronic device to place this rigid loop connector to receive the Mini QD Loop Connectors used on all of our straps, slings and harnesses.

OP/TECH USA offers, at no additional cost, an assessment of your warehouse or distribution operations and will recommend the solution(s) that will improve safety and increase productivity and efficiency.
