GENERAL INFORMATION

TIMING HEROES

SINCE 1892

Pilots. Soldiers. Explorers. Artists. These are our heroes — those whose accomplishments shine on throughout the decades and the centuries, inspiring us to strive, to think bigger, to go boldly forward. For 130 years, Hamilton Watch has supported the endeavors of such heroes, providing them with timepieces unparalleled in accuracy, design and technology.

From the very beginning in Lancaster, Pennsylvania in 1892, Hamilton was trusted for the professionalism and savoir faire of its watchmakers and for the accuracy of its products — indeed, the American railroad industry relied upon us almost exclusively in the late 19th and early 20th centuries.

When, during the First World War, soldiers required a new type of timepiece to time troop movements, we adapted our pocket watches for use on the wrist — the first step in a long relationship with the American military. This relationship continued during the Second World War, when Hamilton paused all consumer production and, between 1942 and 1945, manufactured over one million military timepieces, including 10,000 marine chronometers. These timepieces were so integral to the navigation on water and essential to complete a mission that we were awarded the Army-Navy "E" Award for excellence in manufacturing in 1943.

While conquering the railroads and the battlefield, we took to the skies: During the nascent days of early aviation, Hamilton provided a wrist-worn version of its trench watches to brave military aviators. In 1918, we became the official timekeepers of the first U.S. domestic airmail routes, and in 1926 we provided timepieces for Richard E. Byrd's pioneering North Pole flight. Throughout the decades we have partnered with specialized units such as Air-Glaciers, Air Zermatt — the famed Swiss mountain rescue service — and Patrulla Aspa, the Spanish Air Force's helicopter display team. And soon, our game-changing partners at Syroco and Smartflyer will attempt to set new records with sustainably powered vehicles.

Heroes today and tomorrow

For the past 130 years, Hamilton has outfitted heroes and supported their work — from famed airman Richard E. Byrd to daredevil pilot Dario Costa, from the anonymous but valiant American soldier of the Second World War to underwater explorer Pierre Frolla, and from cutting-edge filmmakers like Stanley Kubrick and Christopher Nolan to leading actor Daniel Henney. Here's to the heroes of the next 130 years and their pursuits — here's to a future bright with possibility, timed by Hamilton.

< The Khaki Field Murph 38mm is powered by the H-10 automatic movement boasting an 80-hour power reserve.

Built for outdoor adventures, our Khaki Field Titanium Automatic is ready for action with a combination of lightweight case and authentic military-inspired style.

The new PSR model is a dynamic take on the 1970s original. Now available in green hybrid LCD-OLED display.

The Ventura XXL Bright offers a remarkable quartz movement that illuminates the dial in red with a push of the 9 o'clock button.

HAMILTON, 130 YEARS OF HISTORY

ICONIC WATCHES

THE HAMILTON HALL OF FAME

Many Hamilton watches have earned their place in watchmaking history thanks to their iconic design or pioneering functionality. From appearances on A-list wrists to revolutionary movements, from essential tools for military personnel to brilliant science fiction film props, at Hamilton, we are very proud to present our Hall of Fame. Here are just a few of the entries:

POCKET WATCH 992 - RAILROAD - By the time this model was produced in 1920, Hamilton's reputation as the watch of railroad accuracy had spread beyond the borders of the U.S. and the 992 model was selected by the U.S. government as the timekeeper of the American built railroads of France. The pocket watch continued to be a popular model until it was eventually replaced by wristwatches.

VENTURA - ELVIS PRESLEY - This watch, purchased by Elvis Presley on December 24, 1965 is the only surviving Ventura with an undeniable link to the King of Rock 'n' Roll. Hamilton bought the watch from the Graceland estate at auction in 1999 for our Museum Collection. It was acquired by Hamilton, the watch has been exhibited all around the world.

HAMILTON PULSAR - The world's first LED digital watch made an immediate impact upon its release in 1970. It was the world's first completely electronic wristwatch. Hamilton Pulsar was particularly unusual in that it only showed the time when prompted to do so by activating the pusher on the side of the case.

MILITARY WRIST WATCH - CANTEEN - Featuring a special water-resistant case with a screw down crown cover, watches like these were supplied to U.S. Naval Divers during World War II. The reliable, water-resistant watches were considered an essential piece of equipment to support the divers on their missions which included preparing safe landings for troops and supplies on hostile shores. For historical accuracy, the watch appeared in the award-winning 1951 movie *The Frogmen*.

AVIATION

TECHNICAL | RELIABLE

Khaki Aviation

The Khaki Aviation collection perfectly displays Hamilton's technical know-how when it comes to creating reliable watches for pilots, co-pilots and urban aviators. Offering superior readability and packed with aviation features, the collection includes precision timepieces for professionals as well as watches with the authentic aviation look and feel Hamilton is known for. Adventure meets accuracy in a pilot's watch.

MARINE

NAUTICAL | UNDERWATER

Khaki Navy

Inspired by marine pioneers and designed with ocean explorers in mind, Hamilton's Khaki Navy collection is guaranteed to make a splash in the style stakes. With performance pieces offering wearers eye-catching luminescent displays and the guarantee of Hamilton quality, the Khaki Navy collection is at home on, in or under the water.

MILITARY

RUGGED | ROBUST

Khaki Field

From the original soldier's watch to rugged and robust new models designed for life's adventurers, the Khaki Field collection was inspired by military and built to last. With bold design, functionality and resilient construction as standard, these watches are essential kit for the outdoors and are ready for anything. Guaranteed to be equal to your needs out in the field.

REFINED CRAFTSMANSHIP | CONTEMPORARY

Jazzmaster

The Jazzmaster collection features a wide range of contemporary watches that draw on Hamilton's long history and tradition of producing quality timepieces, offering a refined look for those who enjoy the finer things in life. Striking a perfect balance between tradition and sophistication, the Jazzmaster collection offers wearers the ideal timepiece for milestone moments, and beyond.

ICONIC UNCONVENTIONAL | DARING

Ventura

Iconic, groundbreaking and a design classic, the Ventura is more than 60 years old but has the same rebellious appeal as it did on its launch day. Daring and unconventional in design, it has been a mainstay of the Hamilton collection for many years, thanks in part to its most famous fan – Elvis Presley. In the current collection, the world's first electric watch keeps its distinctive triangular shape and strong character but is updated for 21st Century watch enthusiasts. As individual as those who wear it.

AUTHENTIC SIGNATURE STYLE | LEGITIMATE

American Classic

A reflection of Hamilton's American roots, this collection offers versatility in a selection of 'wear anywhere' watches. Classic pieces sit alongside modern interpretations of heritage watches, underlining Hamilton's signature style and staying true to our American spirit. The collection is designed for those who appreciate classic American style.

BRAND CAMPAIGN

Our visuals highlight the design, heritage and innovation of our watches. The eye-catching and inspiring lifestyle pictures capture the essence of each collection and reflect Hamilton's values of authenticity and individuality.

For more details, please refer to the official Advertising guidelines available on MAPS

HAMILTON SOCIAL MEDIA

At Hamilton, we use social media to communicate with end consumers beyond the walls of our stores. You can reach and follow us on these key platforms under HamiltonWatch.

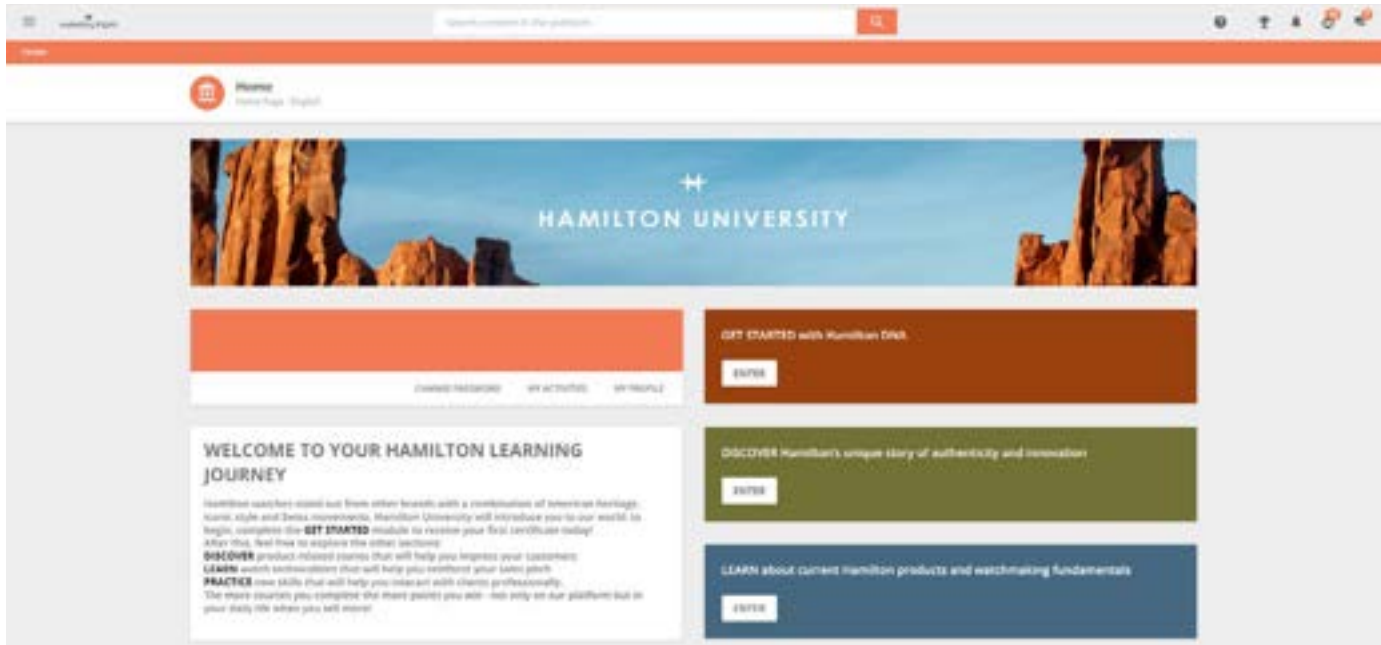

#HAMILTONWATCH

The regular corporate Hamilton posts are planned, posted, monitored and responded to by the team at HQ. However, social media is also an effective tool for retailers and can be used to help create campaigns, support in-store events and drive traffic to your social media accounts or store website. If you would like to learn more about harnessing the power of social media to promote Hamilton for your retail store, please ask your local representative to connect you with the team at HQ. We're here to help.

Hamilton University is an interactive and comprehensive online learning platform. It includes courses about Hamilton watch collections, visual merchandising guidelines and watchmaking knowledge.

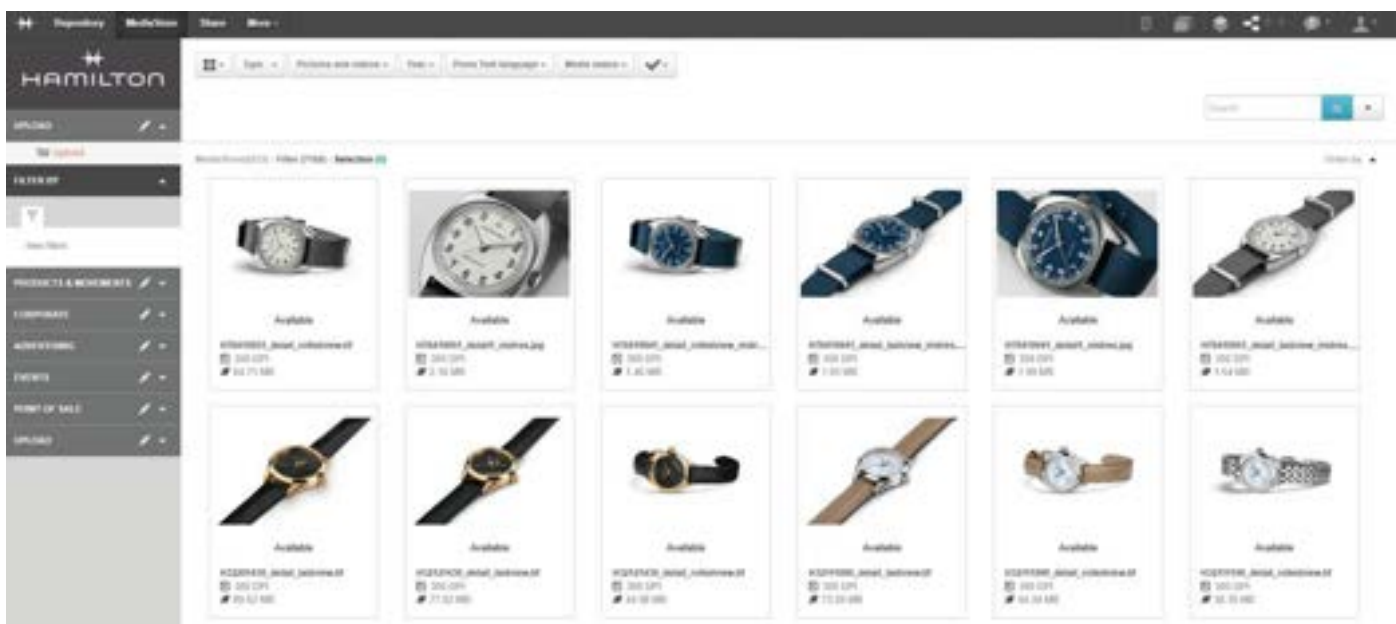

Free admission to the Hamilton University via hamilton-uni.com

MAPS MEDIA DATABASE

MAPS is our media-sharing platform for images, press texts and point-of-sale (POS) material. The platform gives you access to high quality images for both print and digital use. You can access MAPS from your desktop or mobile device. The resource is password protected.

Hamilton Corporate Store in Cat Street, Tokyo, JP

HAMILTON MOVEMENTS

At Hamilton, we understand the need to choose the perfect movement for each watch. Each specially adapted Hamilton movement has a name that begins with the letter 'H'. To date, we have developed 17 different Hamilton branded movements. Each of these is a small piece of Hamilton history and progress.

H-10 | 80h Power reserve | Automatic | Date function

H-10-S | 80h Power reserve | Decorated movement | Automatic | Skeleton movement

H-12 | 38h Power reserve | Automatic | Regulator

H-13 | 80h Power reserve | Decorated movement | Automatic | Date function and power reserve indicator

H-14 | 80h Power reserve | Decorated movement | Automatic | Date function and GMT 24-hour indicator

H-20-S | 38h Power reserve | Decorated movement | Automatic | Skeleton movement

H-21 | 60h Power reserve | Decorated movement | Automatic chronograph | Day Date function | Two to three counters

H-21-SI | 60h Power reserve | Automatic chronograph | Day Date function | Silicon Balance spring | Three counters

H-22 | 38h Power reserve | Decorated movement | Automatic | Date function | Small second at 8 o'clock

H-30 | 80h Power reserve | Automatic | Day Date function

H-31 | 60h Power reserve | Decorated movement | Automatic chronograph | Date function | Two to three counters

H-32 | 38h Power reserve | Decorated movement | Automatic | Date function | Small second at 6 o'clock

H-40 | 80h Power reserve | Automatic | Day Date function

H-41 | 60h Power reserve | Decorated movement | Automatic chronograph | Day Date function | Passing through chronograph second hand

H-41e | Chronograph quartz | Worldtimer function | Automatic adjustment to summer/winter time | Two counters

H-50 | 80h Power reserve | Handwinding | Date function

H-51 | 60h Power reserve | Handwinding chronograph | Two counters

INSTRUCTIONS

Khaki Aviation Converter

INTRODUCTION

The Khaki Aviation Converter enables you to make a number of instant calculations using scales printed on the rotating bezel **A** and the flange **B**.

MULTIPLICATION

For a multiplication, turn the bezel **A** to align the number chosen as the common multiplier, in this case 15 (orange arrow), with index 10 on the flange (black arrow).

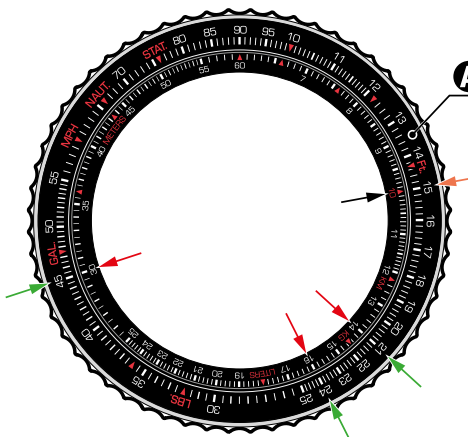

The result (green arrow) appears opposite the multiplied number (red arrow).

Below are three examples of calculations performed using 15 as the common multiplier.

- 14 x 15 = 210**
- 16 x 15 = 240**
- 30 x 15 = 450**

Note: Depending on the numbers used in the calculations, the results can be read in simplified terms. For example, if the result displayed is 21, this can also mean:

- 2.1 for a multiplication of 1.4 x 1.5
- 21 for a multiplication of 1.4 x 15 or 14 x 1.5
- 210 for a multiplication of 14 x 15
- 2100 for a multiplication of 140 x 15 or 14 x 150
- 21000 for a multiplication of 140 x 150 or 14 x 1500

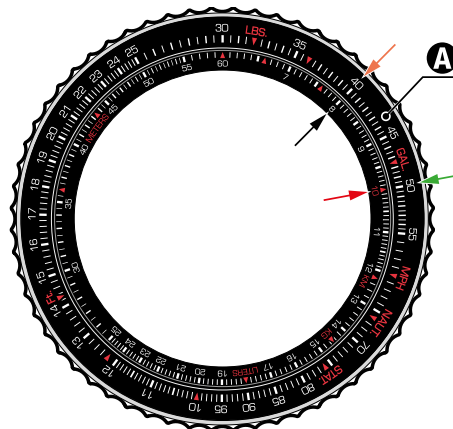

DIVISION

For a division, turn the bezel **A** to align the number to divide, in this case 40 (orange arrow), with the divisor number on the flange, in this case 8 (black arrow).

The result (green arrow) appears opposite index 10 on the flange (red arrow) and must logically be read as 5.

Reading examples:

- 40 : 8 = 5**
- 40 : 0.8 = 50**
- 400 : 8 = 50**
- 400 : 0.8 = 500**
- 4000 : 80 = 50**

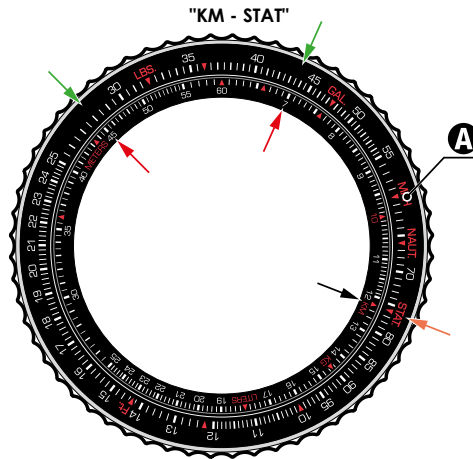

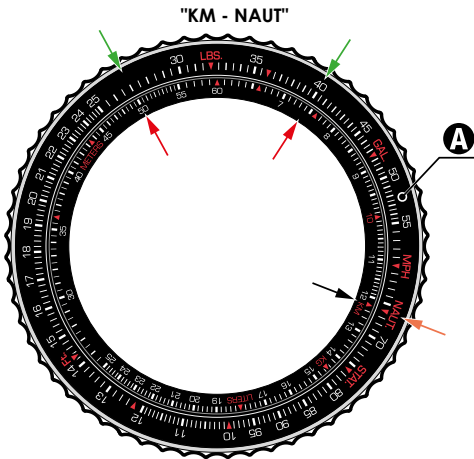

CONVERTING KILOMETERS TO NAUTICAL MILES OR STATUTE MILES

To convert kilometers (KM) to nautical miles (NAUT) or statute miles (STAT) or vice-versa, turn the bezel **A** in order to align the "NAUT" or "STAT" index (orange arrow) with the "KM" index on the flange (black arrow).

The result (green arrow) can be immediately seen opposite any number indicated on the flange (red arrow).

Examples KM - NAUT:
50 KM = 27 NAUT or **5 KM = 2.7 NAUT**
74 KM = 40 NAUT or **7.4 KM = 4 NAUT**

Examples KM - STAT:
45 KM = 28 STAT or **4.5 KM = 2.8 STAT**
70 KM = 43.5 STAT or **7 KM = 4.35 STAT**

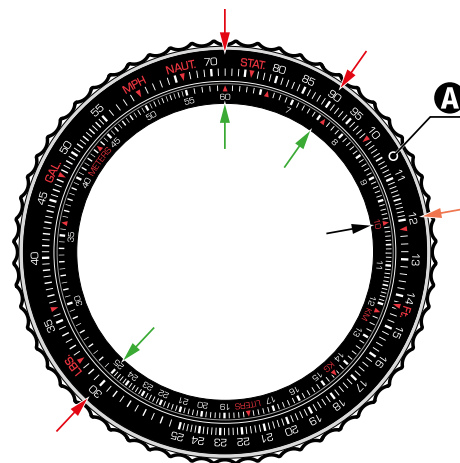

CONVERTING CURRENCIES

Example: You would like to convert Swiss Francs into Euros. The exchange rate is CHF 1.20 for EUR 1.

To do this, turn the bezel **A** to align the exchange rate, in this case number 12 for CHF 1.20 (orange arrow), with index 10 on the flange (black arrow).

The result (green arrow) appears opposite any number indicated on the bezel (red arrow).

Three examples:
 CHF **3** = EUR **2.5** CHF **7.2** = EUR **6** CHF **9** = EUR **7.5**
 or or or
 CHF **30** = EUR **25** CHF **72** = EUR **60** CHF **90** = EUR **75**
 or or or
 CHF **300** = EUR **250** CHF **720** = EUR **600** CHF **900** = EUR **750**

You can find other examples of calculations in the Instruction Manual provided with the watch or on our website.

Khaki Aviation

The Khaki X-Wind integrates a drift – angle calculator, enabling pilots to accurately calculate and record the crosswinds they will encounter on their planned journey.

- 1 Time/date/day setting crown
- 2 Chronograph start/stop button
- 3 Chronograph resetting button
- 4 12-hour counter
- 5 30-minute counter
- 6 Small second hand independent of chronograph

- A Exterior rotating bezel
- B Crown for adjusting (C)
- C Upper interior rotating bezel
- D Crown for adjusting (E)
- E Lower interior rotating bezel

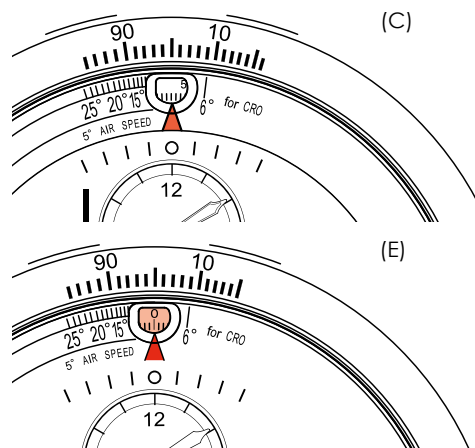

INSTRUCTIONS FOR USE

The Hamilton Khaki Automatic X-Wind has three screw-down crowns and two push-buttons.

- (1) crown for setting the time, the day and the date
- (B) crown for adjusting the upper interior rotating bezel (C)
- (D) crown for adjusting the lower interior rotating bezel (E)
- (2) button to start and stop the chronograph
- (3) button to reset the chronograph to zero

CROSSWIND

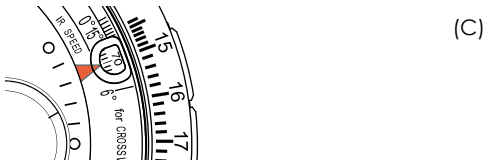

- 1 Position the red arrow of the upper interior rotating bezel (C) at 12 o'clock by adjusting with crown (B). Adjust the lower interior rotating bezel (E) to 0° by adjusting with crown (D).

- 2 Obtain wind speed and direction from control tower or weather chart.

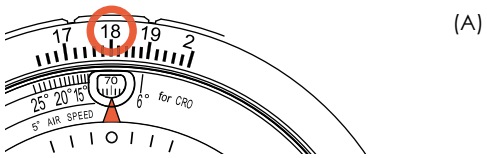

Ex. Wind speed: 40 mph
Wind direction: 70°

Indicate wind direction (70) in the window with the upper interior rotating bezel (C) by adjusting with crown (B)

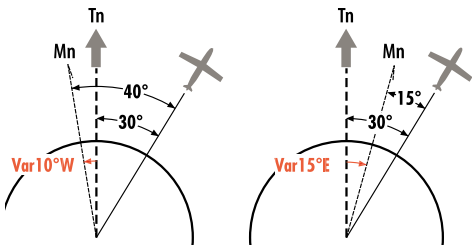

- 3 Adjust the exterior rotating bezel (A) so that one tenth of the speed of the aircraft is indicated opposite the arrow.

Ex. Aircraft speed: 180 mph – indicate 18.

- 4 From the geographical bearing, calculate the magnetic bearing of the aircraft: The variation (Var) depends on the current location, which can be determined from an aviation chart

If the variation (Var) is to the West, it is added to the geographical bearing to obtain the magnetic bearing.
Ex. $30^\circ + 10^\circ = 40^\circ$

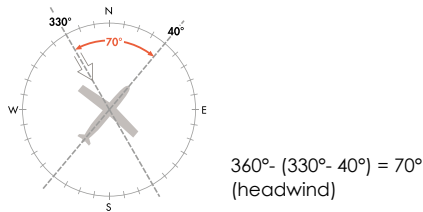

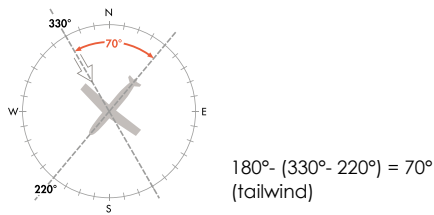

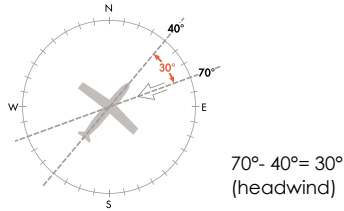

If the variation (Var) is to the East, it is subtracted from the geographical bearing to obtain the magnetic bearing.
Ex. $30^\circ - 15^\circ = 15^\circ$

Tn: True North
Mn: Magnetic North
Var: Variation

Ex. Geographical bearing: 30°
Variation (Var): 10°
Magnetic bearing: $30^\circ + 10^\circ = 40^\circ$

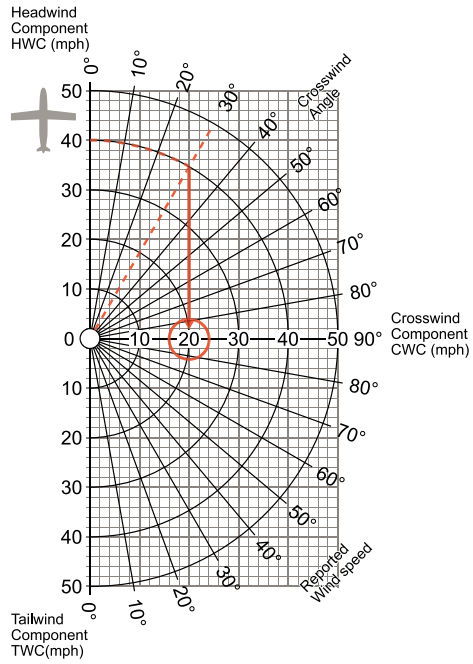

- 5 Calculation of crosswind angle.

Ex. Wind direction: 70°
Magnetic bearing of aircraft: 40°
Crosswind angle: $70^\circ - 40^\circ = 30^\circ$ (headwind)

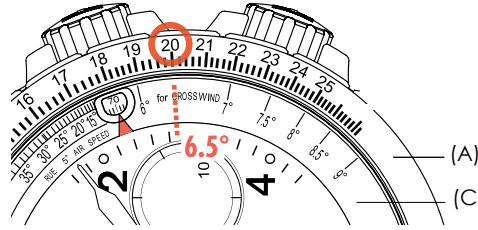

- 6 Calculation of crosswind:
Using the graph (plastic card) determine the point of intersection of the wind speed (head/tailwind component) and the crosswind angle. Going from the point of intersection, read the value of the crosswind component on the horizontal axis.

Ex. Headwind component: 40 mph
Crosswind angle: 30°
Crosswind component: 20 mph

- 7 Calculate the angle of drift:
Locate the crosswind component (20) on the exterior rotating bezel (A) and read the value indicated on the interior bezel (C).

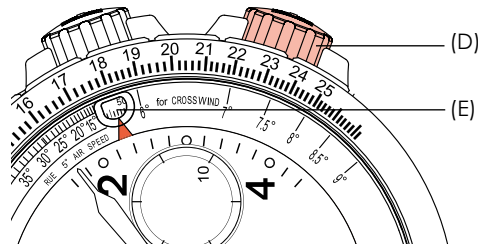

Ex. Angle of drift: approx. 6.5°

- 8 Calculation of corrected bearing:
If the wind is blowing from the right, add the angle of drift to the magnetic bearing. If the wind is blowing from the left, subtract the angle of drift from the magnetic bearing o.

Ex. Corrected bearing: $40^\circ + 6.5^\circ = 46.5^\circ$

For memorization, use the crown (D) to indicate the corrected bearing (46.5°) on the lower interior rotating bezel (E).

*This Hamilton leather strap is made from natural materials. The leather is tanned, but has not been treated, pigmented and finished in the same way as some other leather straps. This helps it to retain its natural look and also means that every piece is not exactly the same. As a result, the color of the leather strap may differ from the color shown on the image.
