KEEP GOING FORWARD

Designed for those who live with daring and style, the Seiko Prospex Collection meets every challenge with technological excellence and iconic design. This is the timepiece for the thrill-seekers, the risk-takers, for those who seize each moment and demand a watch that they can rely on whatever the situation.

A long-time leader in high-intensity watches, Seiko continues to build on the legacy of such landmark achievements as its 1965 first diver's watch to provide superior timekeeping. This year, the Speedtimer collection adds a new chronograph movement measuring elapsed time in 1/100 second increments, and vivid color variations inspired by vintage motor sports. Undersea, on land or in the air, Prospex, with advanced automatic and solar movements, provides precision and dependability when it truly counts.

MASTERWORKS OF WATCHMAKING

Each stunningly crafted Presage reflects the vibrance of Japanese artistry and style, highlighted by exquisite attention to detail and superior Japanese mechanical watchmaking. Reflecting a unique view of beauty, nature and art, every Presage conveys a special story of time and place. The bracing spirit of modern Tokyo, particularly its elegant lounges, is captured by the newest Cocktail Time designs, with the gradated colors, intricate patterning and gloss finish of each dial evoking a delicious concoction and a magical night, while the exciting Style '60s collection celebrates the vibrant spirit of the 1960s, as exemplified by Seiko's 1964 "Crown Chronograph," Japan's first watch with a stopwatch function. And each Presage is perfectly balanced, from those distinctive dials to the masterfully turned hands and the see-through casebacks offering a view of classic timekeeping in action. Exquisitely detailed in every respect, each Presage is a tribute to fine watchmaking.

STYLED FOR PERFORMANCE

A sophisticated blend of style, precision and innovation, Coutura is crafted for effortless excellence. The watch for those who know what they want and where they're going, who make their own rules and forge their own paths, each Coutura is thoroughly contemporary in technology and design. With bold angles, dimensional patterns and bright color accents, new designs update the classic chronograph with masterfully integrated sport/dress styling. Offering both quartz and solar movements with no battery change required, including automatically adjusting Radio-Sync Solar models, every Coutura delivers non-stop performance for today's world.

RADIO SYNC SOLAR

Radio Sync Solar Chronograph automatically receives radio signals daily of an official standard frequency from USA (Fort Collins), Japan, China, or Germany to precisely adjust the time and calendar.

SEIKO SOLAR

Seiko Solar watches collect energy from any light source and convert it into electrical energy. This energy is stored in a rechargeable lithium ion cell which takes the place of a conventional watch battery. From there, the watch operates like any other quartz watch.

SOLAR ANALOG/DIGITAL

With both traditional and digital displays, the functions of this movement include a stopwatch, dual time capability, a calendar, and an alarm.

ALARM CHRONOGRAPH

Seiko alarm chronographs offer the features of a chronograph along with a 12-hour alarm.

CHRONOGRAPH WITH POWER RESERVE

In addition to the stop watch, this chronograph displays the remaining power reserve, so you can always know when it's time to recharge.

CHRONOGRAPH

Seiko chronographs provide standard watch functions as well as precise stopwatch timing for a variety of activities.

PERPETUAL CALENDAR

The Seiko Perpetual Calendar automatically adjusts for odd and even months including February of leap years.

AUTOMATIC

Self-winding mechanical watches operate using power obtained from a mainspring which is wound automatically with the motion of the wearer's arm.

WATCH REGISTRATION AND INSTRUCTION MANUALS

<https://seikowatchesusa.com/watch-registration>

Seiko bracelets are designed to be elegant and durable, as well as easy to adjust.

PRO TIPS

- Before "sizing," estimate the number of links you'll want to remove, and remove sections, rather than individual links, when you can.
- If you are only making a small adjustment, check to see if it can be made by adjusting the clasp mechanism before you start removing links.
- Save the removed links.
- Work on a flat surface so the links stay aligned.
- On expansion bracelets, remove links from near the center of the watchband.
- On clasp bracelets, remove an equal number of links from the bracelet on each side of the clasp.

Seiko has introduced a bracelet sizing coding system, adding a sizing code on each bracelet after the Band # with a dot in-between as shown below. The bracelet code can be found on the back of the bracelet either on the end piece, clasp, or on the links.

114BA . A

Band No.

Bracelet sizing code

See Operational Guide for detailed instructions on bracelet sizing codes.

LOCKING TAB BRACELETS

- 1. Many bracelets, particularly expansion bracelets in a "topshell and bottom box" design, are locked together by bent tabs of metal. To size these bracelets:
- 2. Place the band upside down and use a thin blade to pull out and straighten the tab on one end of a topshell.
- 2a. Lift the band, pivot the end of the topshell with the straightened tab away from the band and "unhook" the other hand to free the topshell. Put this topshell aside for reassembly. Repeat this procedure, on the topshell at the other end of the section you want to remove.

- 3. Place the band rightside up so you can see the "top boxes" you have exposed by removing topshells. Next, use a thin blade to pull out and straighten the flaps on the bottom boxes diagonally to the left of the topshells you have removed.

- 3a. Then straighten the flaps on the exposed top boxes.

- 4. Keeping the bracelet on a flat surface, slide the left hand section of the bracelet away from you as you pull the right hand section toward you.

- 5. Remove the unwanted section and align the two parts of the band for reassembly. "Staple A," the small hook on the left hand section, should slide into the top box on the right hand section above the spring. "Staple B," on the right hand section should slide into the bottom box on the available left hand section.

- 6. Gently “close” the flaps on the top and bottom boxes. Do not use pliers – they can damage a bracelet.
- 7. Take the first topshell you removed and hook its unbent end into the bracelet over the top box flap. Pivot it into place.
- 7a. Rebend and insert the tab to lock the topshell into position.

SCREW PIN BRACELETS

These bracelets are easy to size. Unscrew the pins that hold the links you wish to remove, remove those links, reassemble the band, and re-insert a screw to hold it together. Note that in some bracelets, not all links have accessible screws.

SPRING CLIP BRACELETS (SIZING CODE E)

These bracelets can be quickly sized, once you know how. Looking at the underside of the bracelet, place a pointed object into a spring clip you want to remove and slide the spring clip in the direction of the arrow. Once you have removed the appropriate number of links, align the remaining parts of the bracelet and put one of the spring clips you removed back in to join the bracelet back together.

SPLIT PIN TYPE (SIZING CODE I)

Push the pin in with the SEIKO Multiple Band Sizing tool or a common band sizing tool in the direction of the arrow and the pin will be removed from the link.

After removing the appropriate number of links, reassemble the links and insert the pin using the sizing tool in the opposite direction of the arrow.

PIN AND SPLIT PIPE TYPE (SIZING CODE C)

Push the pin in with the sizing tool in the direction of the arrow and the pin and a pipe can be taken out.

Remove the appropriate number of links.

REASSEMBLY

Type A

Reassemble the links, place the pipe into the hole of the link and insert the pin in the opposite direction of the arrow.

Type B

Place the pipe into the hole of the link, reassemble the links and insert the pin in the direction of the arrow.

Type C

Place the pipe into the hole of the link, reassemble the links and insert the pin.
