

## How to size:

- Print out this CM ruler and measure each nail from sidewall to sidewall (about the middle of your fingernail where it is the widest).
- Record the number for each nail (ex. index finger: 1.2cm)
- Send to me including the shape nail ordered.
- I will measure each artificial nail to closely get it to the size needed.

Sizing kits are also available for purchase. Comes with 10 different sized artificial nails in the shape needed.
