

No time to horse around!

Teresa Trayals has made a boo-boo! When photographing animals during her latest adventure, she held her camera the wrong way round! Her expedition report is useless without revisiting each location to identify which eight animals she'd tracked down.

To help, you need to review the footage on Google Streetview at each of the links below. Once you 'arrive' at your destination, just LOOK BEHIND YOU! You'll discover the eight animals which Teresa traced and identify the one remaining animal she needs to track down.

Animal Checklist:

bear

camel

cat

chimpanzee

dog

donkey

elephant

penguin

whale
