## Burundi Coffee

The Cup: Sweet with citric acidity and a smooth mouthfeel;  
Caramelized sugar, toffee, grapefruit and mild floral flavors.

***Nestled in Africa and about the size of the state of Maryland, lies Burundi. It was civil war-torn in the 1990s and the country's economy was nearly totally devastated. In the first decade of the 2000s, inspired in large by neighboring Rwanda's success rebuilding through coffee, Burundi's coffee industry saw an increase in investment. This has helped Burundi establish itself as an emerging African coffee-growing country, despite its small size and tumultuous history.***

***Burundi like other countries, battle diseases in there coffee shrubs but research efforts to eradicate them, look promising for the future. Burundi is one of the poorest countries in the world and we are pleased to help support them by buying their coffee.***
