

3V GEAR FIRE ESCAPE PLAN

HOW TO BUILD A FIRE ESCAPE PLAN

- 1** Use the graph to draw your home's floor plan and plot your home fire escape routes. Print multiple copies for the different levels of your home.
- 2** Make sure everyone in your family knows how to exit every room in your house.
- 3** Include the rendezvous area where everyone should meet outside the home.
- 4** If a fire does occur, make sure everyone knows to get out of the house and not go back in. Call for help after you are outside the house.
- 5** Make sure you practice your evacuation plan with different scenarios.
