

Product Specification

Makerspace Works HPL Bench

Top

Standard top surface is constructed of 1-1/8" laminate surface with backer sheet that is thermoset to the core material to provide balanced construction. Edges are machined to provide a smooth contour for 2mm PVC edging.

Frame / Legs

The bench has four 2"x2" 16-gauge steel legs. On each end there are two legs fully welded together by an upper 1"x1-1/2" 16-gauge steel tube with a threaded insert and a lower 1"x1" 16-gauge steel tube. A 14-gauge steel mounting plate is secured to underside of bench top by sixteen 3/4" Phillip No. 2 screws. Fixed height (18").
