

Product Specification

Air Cafe Height 4-Leg Chair

Seat Shell

The Air Shaped Seat Shell is a one-piece soft polypropylene shell designed with an ergonomic hourglass shape, allowing for proper lumbar and high back-shoulder support. The shell is engineered for the ultimate comfort flexible back. The shell features forty-eight 3/8"-sized holes in the seat and forty 3/8"-sized holes in the back for ventilation. The seat is attached to the frame by means of six steel rivets attached to a fully welded engineering mounting bracket.

Weight (lbs.)

Senior 24":17 lbs.  
Senior 30":18.2 lbs.

Freight Class

150

Frame

All leg tubes are 1" x 16-gauge tubular steel with 16-gauge mounting brackets. Leg tubes, mounting brackets and a saddle support bracket are fully welded together using continuous welds to form a structurally solid, freestanding frame. Chairs are at a standard 30" seat height and have a 1" tubular foot rest.
