

Product Specification

Air Rocker Chair

Seat Shell

The Air Shaped Seat Shell is a one-piece soft polypropylene shell designed with an ergonomic hourglass shape, allowing for proper lumbar and high back-shoulder support. The shell is engineered for the ultimate comfort flexible back. The shell features forty-eight 3/8"-sized holes in the seat and forty 3/8"-sized holes in the back for ventilation. The seat is attached to the frame by means of six steel rivets attached to a fully welded engineering mounting bracket.

Freight Class

150

Frame

Leg tube is continuous and is a 12-gauge heavily reinforced tubular steel. Legs are 1" round in diameter. Double Strut supported frame. Mounting brackets are 16-gauge. Leg tubes and mounting brackets are all to be circumferential welded to form a structurally solid, freestanding frame. The base leg arc is perfectly balanced to provide a gentle rocking motion.
