

Product Specification

Explorer Cafe Height Cantilever Chair

Seat Shell

The Explorer Shaped Seat Shell is a one-piece shaped seat shell designed with a smooth back patented flat ribbing support system, specifically through the center back of the seat referred to as the "Power Rib". The "Power Rib" is essential to achieving a smooth and flexible back design. Stability Ribbing along the sides have been added for extra support and strength. The seat is attached to the frame by means of six steel rivets attached to a fully welded engineered mounting bracket.

Frame

All leg tubes are 3/4"x1 1/2" elliptical 16-gauge tubular steel with 16-gauge mounting brackets. Leg tubes and mounting brackets are all to be circumferential welded to form a structurally solid, freestanding frame with a foot rest.
